

ATU AI Task Force

Information Systems, Data, and Public-Facing Operations – Committee Update 09.17.2026

Activities/Status

Over the past several months, the subcommittee has reviewed ATU's systems, data practices, and public-facing operations against current AI capabilities, the ATU AI Guiding Principles, and Act 848, and has produced a set of drafts that are nearly ready for review.

- Domain module: ATU governance framework for Information Systems, Institutional Data, and Public Operations information systems to enable the use of AI as outlined in the ATU AI Guiding Principles, and Act 848.
- Draft ATU AI and Automated Decision Tool Policy; proposed AI-related amendments to 4 current ATU policies.
- Draft Data Classification and Handling Requirements framework and a one-page stoplight guide for use.
- Draft Procurement AI terms and conditions (ready for Legal review) and an AI risk-tier model for hardware and software evaluation (still in development).
- Draft AI guidance for Marketing and Communications policy.
