Upon completion of the Phlebotomy program a graduate will be able to:

- PLO 1. Identify anatomy and physiology of the circulatory system.
- PLO 2. Specimen collection
  - 2.1 – Exhibit blood specimen collection procedures.
  - 2.2 – Demonstrate manual dexterity in specimen collection
  - 2.3 – Demonstrate standard blood specimen processing and handling techniques
  - 2.4 – Complete 100 successful unassisted blood draws at a clinical site prior to graduation.
- PLO 3. Explain laboratory operations including quality control, infection control and safety practices.
  - 3.1 – Evaluate equipment and inventory.
  - 3.2 – Demonstrate appropriate handwashing and use of Personal Protection Equipment (PPE).
  - 3.3 – Exhibit safe use of equipment and disposal of materials.
  - 3.4 – Evaluate patient safety and documentation
- PLO 4. Demonstrate appropriate professional work behaviors and skills in hospitals, clinics, and other medical facilities.
  - 4.1 – Display attentiveness to details.
  - 4.2 – Exhibit the ability to work under pressure.
  - 4.3 – Demonstrate appropriate communication skills.
  - 4.4 – Complete 100 hours clinical time prior to graduation.

Graduates are eligible to sit for a national phlebotomist certification exam. Please speak to the program coordinator for more information.
