ALL COURSES

MEDICAL TECHNOLOGY

MEDT 4001: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.

MEDT 4002: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.

MEDT 4003: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.

MEDT 4004: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.

MEDT 4005: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.

MEDT 4006: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.

MEDT 4007: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.

MEDT 4008: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.

MEDT 4009: Professional Coursework

Prerequisite: Acceptance by one of our affiliated schools for the senior year of professional courses.

This generalized course designation is used to represent specific coursework offered by affiliated schools in areas such as clinical chemistry and instrumentation, bodily fluids, microbiology, hematology, immuno-hematology, serology, parasitology, radiobiology, diagnostic nuclear medicine, radiation health physics, nuclear physics/radiochemistry, computed tomography, radiopharmacy/radionuclide therapy, and seminars.
