Excel at Academics

1st Year

Focus on the general education as well as introductory EAM courses.

2nd Year

Continue general education courses, work on EAM electives, as well as EAM core courses. Consider a minor.

3rd Year

Focus on upper-level EAM courses and special topics

4th Year

Complete coursework requirements including internship and capstone.

Gain some Experience

Volunteer to get experience. Keep track of the training you complete. Take FEMA Independent Study courses.

Attend as many guest speaker sessions and EM related-local meetings as possible

Identify internship opportunities. Seek out opportunities to participate in special projects with EAM faculty.

Investigate requirements for full time jobs or other opportunities. Ensure all completed training is reflected on your resume.

Build your Network

Join the Emergency Management Student Association and other campus organizations.

Join EM groups on LinkedIn and other social media. Attend conferences and follow up with connections made.

Connect with EAM program alumni to enhance your professional network.

Inform the people in your network that you are nearing graduation and are on the job market

Your life After College

Start doing job searches to become familiar with position descriptions and related requirements.

Draft resume and keep it updated. Explore job possibilities by doing informal interviews and/or job shadowing.

Do job searches. Enhance your training and experience. Update your resume and request faculty feedback.

Apply for jobs or further your education with the ATU Masters in Emergency Management and Homeland Security
