eTech Developer’s Timeline

When a developer meets the first deadline, the potential for 100% compensation remains. When a developer misses the first deadline, there is a reduction of 10% of the developer’s contracted stipend.

When a developer fails to submit the BlackBoard course 14 days after the initial deadline (second deadline), there is a 100% reduction. The faculty member will need to reapply to develop the course in a future semester with his/her department head and dean’s approval.

This time frame will allow developers roughly ten weeks for course development with continual assistance from Dr. Callaway, Dr. Norton and Mr. Treadwell.

First Deadline

(Ten Weeks)

Developer works with eTech staff on the development of his/her online course.

Second Deadline

(Two Weeks)

Developer submits completed BlackBoard course to Department Heads and eTech.

When a developer fails to submit course by this deadline, there is a 10% reduction.

Third Deadline

(Three Weeks)

Feedback provided to developer from Department Head and eTech.

When a developer fails to submit course by this deadline, the developer receives 100% reduction and is asked to reapply for development of that course.

Course is complete.
