# POSTER TIPS FOR BEGINNERS

**1** **Start with a clear title.**
Make it short, specific, and readable from several feet away.

**Choose readable fonts.**
Use large, clean fonts; avoid cluttered text or long paragraphs.

**Keep it simple.**
Focus on the key points — less text, more clarity.

**Stick to a color scheme.**
Use 2–3 main colors for a polished, professional look.

**Use visuals wisely.**
Charts, graphs, and images should explain your story faster than words.

**Practice your 1–minute pitch.**
Be ready to summarize your work quickly and clearly when people stop by.

**Stay organized.**
Arrange content in a logical flow — intro → methods → results → conclusion.

**Check the details!**
Proofread, verify image quality, and make sure your name and department are included.
