CENTENNIAL CELEBRATION

Arkansas Tech to close its centennial celebration April 29-May 1

NEWS RELEASE: CONTACT: SAM STRASNER, 479.498.6045

Arkansas Tech University will conclude its centennial celebration by hosting a weekend full of events beginning on Friday, April 29. "Our centennial finale weekend will offer a broad range of activities that will appeal to alumni and friends from a variety of affinity groups," said Julie Morgan, on-campus coordinator of the Arkansas Tech centennial. "We invite the Tech family to participate in these events and help us celebrate the past and the future of Arkansas Tech."

Arkansas Tech was founded by Act 100 of the 37th Arkansas General Assembly. Gov. George Donaghey signed the bill into law on April 1, 1909. The original name of the institution was the Second District Agricultural School. The name was changed to Arkansas Polytechnic College in 1925 and Arkansas Tech University in 1976.

Nine faculty members and 186 students reported for the first day of classes at the Second District Agricultural School on Oct. 26, 1910. There was not a great variety in the academic pursuits on campus at that time. Boys studied agriculture, while girls studied home economics. The centennial finale weekend events are scheduled to coincide with the 100-year anniversary of the conclusion of the first academic year at Arkansas Tech. For a complete list of the centennial finale weekend events, call (479) 968-0332 or email jmorgan@atu.edu for more information.

SEASONAL PARENTAL ISSUES

Here are a few things that some parents may be dealing with as the semester winds down...

- Am I going to help my student pack up and move out?
- How is my child coping with research papers, grades, and upcoming finals?
- The family is going to be different when my student comes home for the summer. Am I prepared?
- My child is getting a summer job near college. I'm a little disappointed that my student won't be home for the summer.
- I'm expecting my child to be more mature and independent. I hope my expectations aren't too high.

Keeping your family connected!

SEASONAL STUDENT ISSUES

There's a seasonal ebb and flow when it comes to student issues. Here are a few things that some students may be experiencing this spring:

- Loss of motivation for the final push.
- Spring fever hits and problems arise as students become restless.
- Anticipation of the end of the school year.
- Stress in regards to class registration.
- Papers and exams are piling up.
- Summer job panic.
- Concerns about moving home for the summer.

MOVE IT!

With less than a month to go before the semester ends, now is the time to discuss moving arrangements with your student. Are they moving out of the residence halls for just the summer or back home and will commute their sophomore year? All freshmen and sophomores must live in campus housing unless certain guidelines are met. Now is the time to discuss the following issues:

- **If needed, have you or your student found a storage facility yet?**
- **Will your student be living on campus this summer?**
If so, they will have to change halls during this time.
Sign up for *summer* housing begins on *April 27th*.
- **Will your student be working during the summer? If so, what do they need?**
- **Will they have a different roommate?**

Students must move out within 24 hours of their last final exam. Start encouraging them now to bring home things they no longer need such as heavy sweaters and blankets, old books, and more. Invest in a few plastic containers for last-minute packing; these can be easily re-used for next year's move-in process, plus they will stack and store easily at home over the summer.

SUMMER OPPORTUNITIES

Some students dream about the end of the semester when they'll get a break from classes and the daily grind. Yet, summer isn't a time to slack off completely. Instead, it can be a great time for students to get ahead or catch up.

Summer Classes. Taking a summer class can be a way for your student to get ahead for the next semester. Some students find it helpful to take a class during the summer that they expect to be difficult so they can focus more time and attention on it. If they struggled with a class during the academic year, they might be able to re-take the class to help their overall grade point average.

An Internship or Job. Summer is a great time to get a job. Even better is getting a job that counts as an internship so your student can get credit for her work experience. For instance, if she is an engineering major, perhaps she can intern at a local manufacturing plant, helping design new equipment. If she is an elementary education major, she could work at a day care center or summer camp. Internships are a great way to apply what she's learned in the classroom while gaining practical experience. It's also a great way to understand what a career really entails so your student will know if she really wants to continue in this major. Most internships are done during the junior or senior year, but sophomores may still apply. Some internships are paid, while others just offer experience.

Campus Work-study. If your student is staying on campus to take summer classes, have him look into campus work-study. Many offices are still open during the summer break and will need student workers. The availability of jobs depends on the campus needs and whether or not your student is eligible for work-study as a part of his financial aid package. Non-work-study jobs may also be available.

Volunteer. For the civic-minded student, summer can be a great time to volunteer. As a young adult, this can be an opportune time for your student to travel. Why not travel and give something back?

Do Research. Summer is also downtime for faculty, which allows them time to focus on research. Your student may get the chance to actively conduct research in a field related to his major – faculty often ask good, committed students to assist them. If he's lucky, the professor will include his name when the research is published. What a great thing to add to a resume!

Money Expectations

Talk with your student about your mutual expectations for the summer when it comes to finances. Knowing what they need to earn to help with school costs will help them make more informed choices about summer plans.

ON CAMPUS COUNSELING SERVICES

Did you know that the University has counseling services that are **FREE** to the students? Located in Doc Bryan Building, room 233, our counselors would be glad to speak to your student about academic situations, behaviors, relationships, and feelings that students might be having. Office hours are Monday—Friday, 8:00 am until 5:00 pm.

479-968-0276.

UNDECIDED? NO PROBLEM!

Is your student unsure about his/her major and career? Consider suggesting career development. The Career Development office will provide a series of personality assessment tools that will be used to help your student find his/her ideal major or career based upon interests, motivational traits, personality, values, abilities, aptitudes, personal work style, and work environment preferences. Have your student contact our Career Development office at (479) 968-0278 for more information.
