Curriculum Proposals for 2013-14 Catalog

October 23, 2012 Curriculum Committee / November 13, 2012 Faculty Senate

Department of History and Political Science

- 1. add HIST 3633, History of China, to the course descriptions;
- modify the prerequisites for PHIL 4103, Advanced Logic, from Prerequisites: MATH 2703, Discrete Mathematics, or PHIL 3103, Logic; to Prerequisites: COMS 2903, Discrete Structures for Technical Majors, or MATH 2703, Discrete Mathematics, or PHIL 3103, Logic; and
- 3. modify the Curriculum in Public History as follows:
 - (a) delete COMS 1333, Web Publishing I;
 - (b) add HIST 2513, Sources and Methods in History, and ANTH 2003, Cultural Anthropology;
 - (c) reduce US History Electives from nine hours to six hours;
 - (d) reduce Internship hours from six hours (HIST 4976) to three hours (HIST 4973); and
 - (e) adjust Electives from six hours to nine hours to maintain 120 hours in the program.

Department of Speech, Theatre, and Journalism

- 1. modify the Curriculum in Speech (Theatre Option) as follows:
 - (a) delete three hours of electives; and
 - (b) add three hours of Production Practicum.

Department of Biological Sciences

- 1. add BIOL 2404, Human Anatomy and Physiology I, to the course descriptions;
- 2. add BIOL 2414, Human Anatomy and Physiology II, to the course descriptions;
- 3. add HIM 4203, Healthcare Reimbursement, to the course descriptions;
- 4. change the course number for HIM 4092, Research in Health Information Management, to HIM 4093; and
- 5. modify the Curriculum in Health Information Management as follows:
 - (a) add HIM 4203, Healthcare Reimbursement;
 - (b) change HIM 4092, to HIM 4093; and
 - (c) delete four hours of Electives.

Department of Nursing

- 1. delete NUR 3603, Personal and Professional Self-care, from the course descriptions;
- * 2. add NUR 3792, Theoretical Competency I, to the course descriptions; (amended)
- * 3. add NUR 4792, Theoretical Competency II, to the course descriptions; (amended)

*Faculty Senate delayed action until December 4, 2013 meeting

- * 4. add NUR 4971, Pharmacology Review, to the course descriptions; (amended)
- * 5. add NUR 4981, Introduction to Oncology, to the course descriptions; (amended)
- * 6. add NUR 4983, Nursing Perspectives on Aging, to the course descriptions; and
- * 7. modify the Curriculum in Nursing, in Nursing for Registered Nurses, and in Nursing for LPNs and update the Admission section detailed in the Department of Nursing catalog introduction as follows:
 - (a) allow BIOL 2014, Human Anatomy, or BIOL 2404, Human Anatomy and Physiology I; and
 - (b) allow BIOL 3074, Human Physiology, or BIOL 2414, Human Anatomy and Physiology II.

Department of Professional Studies

- 1. add PS 4143, Nonprofit Governance, to the course descriptions; and
- 2. add PS 4243, Planning for Adult Learners, to the course descriptions.

Department of Electrical Engineering

1. add ELEG 3203, Renewable Energy Technology, to the course descriptions.

Department of Parks, Recreation, and Hospitality Administration

1. add RP 1001, Orientation to Recreation and Park Administration, to the course descriptions.

Department of Emergency Management

1. add EAM 4083, Introduction to Legal Issues in Emergency Management, to the course descriptions.

Department of Agriculture

- 1. add AGAS 3021, Livestock Selection and Evaluation, to the course descriptions;
- 2. add AGAS 3933, Animal Breeding and Genetics, to the course descriptions;
- 3. add AGBU 4073, Commodity Risk and Futures, to the course descriptions;
- 4. add AGBU 4153, Computers in Agriculture, to the course descriptions;
- 5. change the course number for AGAS 2083, Feeds and Feeding, to AGAS 2084; and modify the course description;
- 6. change the course number for AGPS 3024, Forage Crops and Pasture Management, to AGPS 3023; and modify the course description;
- modify the Curriculum in Agriculture Business as follows:
 (a) add AGBU 3133, Intermediate Agricultural Macroeconomics;
 - (b) add AGBU 4043, Appraisal of Farm Real Estate;
 - (c) add AGBU 4153, Computers in Agriculture;
 - (d) add AGBU 4063, Agriculture Investments;

- (e) add AGBU 4073, Commodity Risk and Futures; and
- (f) reduce upper division Agriculture Electives to 7 hours;
- 8. modify the Curriculum in Agriculture Business (Animal Science Option) as follows:
 - (a) (1.) add AGAS 3933, Animal Breeding and Genetics; and
 - (2.) delete three hours of Electives;
 - (b) (1.) change AGAS 2083, Feeds and Feeding, to AGAS 2084; and
 - (2.) change AGPS 3024, Forage Crops and Pasture Management, to AGPS 3023;
- 9. modify the Curriculum in Agriculture Business (Pre-Veterinary Medicine Option) as follows:
 - (a) add AGAS 3933, Animal Breeding and Genetics; and
 - (b) delete BIOL 3034, Genetics (note: program will still have 121 hours after the change); and
- 10. add the Curriculum in Agriculture Business, Feed Mill Management Option.

Department of Computer and Information Science

- 1. add COMS 3233, Database Design and Implementation, to the course descriptions;
- 2. add COMS 3243, Data Mining, to the course descriptions;
- 3. modify the Curriculum in Information Systems as follows:
 - (a) delete COMS 4203, Database Concepts; and add COMS 3233, Database Design & Implementation;
 - (b) delete ACCT 2013, Accounting Principles II; ECON 2013, Principles of Economics II; and add 3 hours of social sciences;
 - (c) delete COMS 2853, Cobol; and COMS 4303, Client Server;
 - (d) add COMS 3163, Web Programming; COMS 3243, Data Mining; and BLAW 2033, Legal Environment of Business;
 - (e) modify footnote 2 to read: 1000-level courses may only be taken to satisfy this requirement with the explicit permission of the Computer and Information Science Department Head; and
- 4. modify the Curriculum in Information Technology as follows:
 - (a) delete COMS 4203, Database Concepts; add COMS 3233, Database Design & Implementation;
 - (b) delete 3 hours of 2000-level General Electives; and 3 hours of 3000-level COMS Networking Electives;
 - (c) add COMS 2213, Data Structures; and COMS 2163, Scripting Languages.

Assessment efforts that made possible recent revisions to the International Studies major also support the creation of these courses and could justify adding this course to the Cultural Affairs option if assessment trends continue.

How will the effect of the change be monitored in ongoing program assessment? Student evaluations, student grades, peer review of teacher performance, senior survey.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached. N/A

3633 History of Modern China (70058), Hist 4983, TC1

Dr. V. Carolyn Neel Mailing Address: 13291 Roanoke Road, Westlake, TX 76262 Telephone 682-237-7222 E-mail: <u>vneel@atu.edu</u>

Note: This is not a Web course, but nevertheless, you will need access to a computer with internet capability. We will be using Blackboard in this course. If you encounter problems, you may contact the Instructor or Campus Support Center at bbsystem@atu.edu or by telephone at 479-968-0646.

IMPORTANT INFORMATION

Course Description: The specific focus of this course will be on the period of Chinese history from the late Yuan dynasty through the fall of Imperial China. We will examine the social, cultural, and political impact of the coming of the European powers and the internal problems of China.

Class Procedure: This is a lecture course, and students are responsible for attendance and notetaking as well as staying current with reading assignments. Any missed material, handouts, discussions, and/or announcements are the responsibility of the individual student.

Required books:

- 1. Huang, Ray. 1587, a Year of No Significance : The Ming Dynasty in Decline. New Haven: Yale University Press, 1981.
- 2. Kangxi, and Jonathan D. Spence. Emperor of China : Self Portrait of K'ang Hsi. Vintage books ed. New York: Vintage Books, 1988.
- 3. Rawski, Evelyn Sakakida. The Last Emperors : A Social History of Qing Imperial Institutions. Berkeley: University of California Press, 1998.
- 4. Chang, Hsin-pao. Commissioner Lin and the Opium War, Harvard East Asian Series, 18. Cambridge: Harvard University Press, 1964.
- 5. Spence, Jonathan D. God's Chinese Son : The Taiping Heavenly Kingdom of Hong Xiuquan. 1st ed. New York: W.W. Norton, 1996.
- 6. Ko, Dorothy. Cinderella's Sisters : A Revisionist History of Footbinding. Berkeley, Calif.: University of California Press, 2005.
- Other Required reading will include the articles posted in the Course Documents folder on Blackboard

Course Goals: This course is designed to promote understanding of human behavior through a deeper understanding of political and cultural history of China. The written assignments are designed to assist students in learning to communicate effectively, to think critically, to evaluate the ethical implications of migrations, to apply scientific and quantitative reasoning, and to demonstrate knowledge of the arts and humanities as applied to the movement of human groups.

Supplemental Readings and Materials: Attendance and Make-up Work: You are expected to attend class and keep up with the required reading. If you miss work because of an excused absence, you may be required to take an essay-only make-up exam in the Social Sciences and Philosophy Office. If you do not have an excused absence you may receive a score of zero on the work missed.

Assessment Methods:

- Participation grade, based on involvement in the Discussion Board dialogue. 150 points
- An autobiography (300-500 words) to be posted on Blackboard. 25 points.
- Five short book reviews (500 to 700 words each), at 30 points each. 150 points
- Mid-term examination and final examination, at 100 points each. 200 points

You are responsible for reading the assigned books as well as the additional reading assignments. You should familiarize yourself with the maps, charts, illustrations, and tables included in the chapters.

Class Policies: *Plagiarism and cheating* – These are serious matters and ALL incidents will be treated as such. You will automatically receive a zero on the work plagiarized/cheated and possibly dropped from the course with the grade of "F". In addition, you will be reported to the appropriate ATU office for disciplinary action (see ATU *Student Handbook*). You should be aware that the instructor has access to the most sophisticated plagiarism detection software available.

WHAT IS PLAGIARISM? Plagiarism consists of borrowing other people's thoughts without giving them due credit, whether or not you actually use their words. Using citations liberally will protect you, as well as showing the instructor that you are a diligent, hardworking student who does actual research rather than merely writing whatever comes to mind. When in doubt, cite. You will NEVER be penalized for citing a source, but are taking a very big chance if you don't.

The schedule for weekly reading and hand-in assignments are in the syllabus below. I will post an announcement if I change the schedule. Make sure you check the Course Reader each week for any new materials. There'll be a reminder on the second page of each PowerPoint. By Friday of each week, you should have viewed the PowerPoint presentation and completed all reading assignments. There may be a significant reduction in points for any materials submitted after the specified due dates Remember that you earn a large part of your grade by participating in the on-line discussions. Do not let this slide.

*

1. Week of 11 Jan	Classes begin 12 January.
	Read the syllabus and the first PowerPoints. Log on to the Discussion
	Board and introduce yourself to your classmates.
	There are two optional readings in the Course Documents folder. You
	may read them or not, it's your choice – they're good background
	information.
	A written autobiography, 300-500 words, should be turned in to the
	instructor either as an e-mail attachment or through digital drop box by
	24 January.
2. Week of 18 Jan	Holiday: 19 January (MLK Day)
	Read the required documents in the Course Reader, focusing particularly
	on Wakeman, "Telling Chinese History," in the Course Documents
	Topic: The Yuan dynasty and the impact of the Mongol Empires
	Written autobiography due on or before midnight. Saturday, 24 January.
3. Week of 25 Jan	Topic: The Early Ming Dynasty
	Begin reading Huang, 1587, a Year of No Significance
	Read any required documents in the Course Reader
4. Week of 1 Feb	Topic: Culture, Commerce, and Government in the Ming dynasty; the
	voyages of Zheng He
	First Book Review due (Huang, Ray, 1587, a Year of No Significance :
	The Ming Dynasty in Decline) at midnight, 7 February
5. Week of 8 Feb	Topic: Weakness and end of the Ming Dynasty
	Read Wakeman, "Romantics, Stoics, and Martyrs" and other assigned
	materials in the Course Documents Folder.
6. Week of 15 Feb	Topic: The Rise of the Manchu
-	Begin reading Kangxi, and Jonathan D. Spence, Emperor of Ching : Self
	Portrait of K'ang Hsi., Book report due at the end of next week-(31
	March) 28 February.
7. Week of 22 Feb	Europeans Discover China: Traders and Missionaries: Second Book
	Review due (Kangxi, and Jonathan D. Spence, Emperor of China : Self
	Portrait of K'ang Hsi.) due by midnight, 28 February.
******	MID-TERM EXAMINATION: 27 Feb – 4 March
8. Week of 1 Mar	Topic: The Oianlong Emperor's expansion, moving to the West.
	Read Waley-Cohen, "Commemorating War," in the Course Reader
	Begin reading Rawski, Evelyn Sakakida, The Last Emperors : A Social
	History of Oing Imperial Institutions)/
9. Week of 8 Mar	Topics: The Macartney Mission: Chinese weakness, problems growing
	Read the assigned materials in the Course Reader.
	Third Book Review due (Rawski, Evelyn Sakakida, The Last Emperors
	A Social History of Oing Imperial Institutions) due by midnight 14
	March
10. Week of 15 Mar	Topics: After the Oianlong Emperor
	Read assigned materials in the Course Reader

	Begin reading Chang, Hsin-pao, Commissioner Lin and the Opium War.
11. Week of 22 Mar	SPRING BREAK
12. Week of 29 Mar	Topic: China's humiliation, growing Japanese and European power; the
	Opium Wars
	Read the materials in the Course Reader.
	Fourth Book Review due (Chang, Hsin-pao. Commissioner Lin and the
	Opium War) by midnight 4 April
13. Week of 5 Apr	The Taipei and Boxer Rebellions; the empress, end of dynastic China.
	Read the assigned material in the Course Reader
	Begin reading Spence, God's Chinese Son.
14. Week of 12 Apr	Attempts at reform, The Chinese attempt to re-group; Late Qing
	Intellectual, Social, and Economic changes Cixi, Warlordism, World War
	I, the May 4 th movement;
	Begin reading Ko, Cinderella's Sisters.
	Note on reading: By the end of this week you should have read at least
	half of Spence's God's Chinese Son and Ko's Cinderella's Sisters. Now,
	decide which one you want to review.
15. Week of 19 Apr	Topics: The Chinese attempt to re-group; Late Qing Intellectual, Social,
	and Economic changes. World War I, the May 4 th movement;
	Fifth Book Review due (Spence, Jonathan D. God's Chinese Son : The
	Taiping Heavenly Kingdom of Hong Xiuquan OR Ko, Dorothy.
	Cinderella's Sisters : A Revisionist History of Footbinding) DUE BY
	MIDNIGHT 25 April.
16. Week of 26 Apr	Class summary, discussion groups
17. Week of 3 May	Last Day of Classes: 4 May
	FINALS 6 May through 12 May. Good luck!
	(Remember, the more you study, the luckier you'll be.)

New Prerequisite (list all, as you want them to appear in the catalog):

COMS 2903 or MATH 2703 or PHIL 3103

New Co-requisite (list all, as you want them to appear in the catalog):

Elective EMajor EMinor If major or minor course, you must complete the Request for Program Change form.

Please provide a rationale for the change including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

The addition of COMS 2903: Discrete Structures for Technical Majors as a prerequisite option would make it easier for computer and information science majors to take Advanced Logic. The degree programs in computer and information science require COMS 2903, and since the subject matter of COMS 2903 includes coverage of both propositional and predicate logic, students who have successfully completed it should be adequately prepared to take Advanced Logic. Hence, including COMS 2903 as a prerequisite option for Advanced Logic would serve to provide computer and information science majors with an upper level elective that should nicely complement their degree programs.

Advising and scheduling for computer and information science majors should be improved by this change.

How will the effect of the change be monitored in ongoing program assessment?

The instructor will track the number of COMS majors who take the course.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

What impact will the change have on staff	Ing, on other programs and space allocation? These changes

What impact will the change have on staffing, on other programs and space allocation? These changes may slightly reduce the enrollment in COMS 1333 and slightly increase the enrollment in HIST 2513 and ANTH 2003. With only about a dozen students currently in the program, these changes should have no impact on staffing or space allocation.

Please provide a rationale for the need for this new course including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

The current program requires 6 hours of internship. Each hour of internship as indicated in the catalog for HIST 4976 requires 100 clock hours of student work. Student feedback suggests that students thought this was excessive. Research into other public history programs indicates that other programs (Cleveland State University, CUNY Buffalo, University of West Georgia) typically require only 3-4 hours of credit with the

average number of clock hours required per student at 50-60 clock hours of work per credit hour. The reduction to 3 hours of internship will bring our program in closer proximity to similar programs. Research has also indicated that COMS courses are rare even in graduate level public history programs, while regular history methods and anthropology/archeology (Stevenson University, Western Michigan, North Dakota State, Southeast Missouri State) are often included as public history program requirements.

ŧ,

If this course will affect other departments a Departmental Support Form for each affected department must be attached. See letters from ANTH and COMS.

What impact will the change have on staffing, on o This change will not affect any other department; courses are tied to the regularly scheduled produce		

Please provide a rationale for the need for this new course including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

Practicum courses provide participation-based hours wherein students can learn, through practice, the skills of production---e.g., acting, directing, stage management, theatrical design, etc. Since Theatre is a hands-on field, it is necessary that graduates have experience participating in actual productions, rather than just through academic study. The vast majority of Theatre programs---including the University of Arkansas and the University of Central Arkansas---require practicum hours.

Until 2012-2013, 3 hours of production practicum were listed for the Theatre Option in the Academic Calendar (see 2011-2012 and before). However, the required hours were only listed in the paragraph before the course matrix, rather than within the matrix itself. Theatre faculty had thought that these hours were required and had been advising students as though they were. The proposed change is to insert the practicum hours into the Theatre Option matrix so that there can be no question that they are required.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

.

Please provide a rationale for the need for this new course including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

This course has been added to meet a need to serve the Nursing Program. Current Nursing students must take BIOL 3074, but typically enter this upper division course with less biology background than Biology majors. The proposed course will provide the Nursing students the needed anatomical and physiological background by presenting the physiological material at a more appropriate level of detail. The Nursing Department assessment indicates that this proposed change will serve their students well.

How will the effect of the change be monitored in ongoing program assessment?

Course grades will be monitored as well as student performance in Pathophysiology (BIOL/NUR 3803), which requires this course as a prerequisite.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached.

See attached.

Proposed New Course Syllabus

Course subject, number, title: BIOL 2404: Human Anatomy and Physiology I

Catalog Course Description:

This course is the first in a two semester sequence that covers the basic structure and function of human organ systems including mechanisms of homeostasis. Specific topics include: body organization, basic biochemistry, cell biology including metabolism, histology, and the integumentary, skeletal, muscular, and nervous systems. Laboratory sessions involve dissection, microscopy, demonstration and/or experimental modeling of concepts. <u>Pre-requisites:</u> Grade of "C" or better in Survey of Chemistry (CHEM 1114) or an Introductory Biology course (BIOL 1014 or 1114); ACT of 19 or above on Math section or completion of Intermediate Algebra (MATH 0903) or any higher level mathematics course with a "C" or better. Lecture three hours, laboratory two hours. \$20 lab fee.

<u>General Education Goals</u>: This course presents basic information about Human Anatomy and Physiology necessary for satisfactory performance in subsequent courses for general biology, nursing or allied health fields. Specific course content is designed to help provide a foundation in the application of scientific and quantitative reasoning, critical thinking, and effective communication; thereby addressing 3 of the ATU General Education Goals.

Course Objectives:

Human Anatomy & Physiology I (BIOL 2404)

Upon successful completion of this course, students should be able to recognize, describe, explain and/or apply knowledge and understanding to the following:

- 1. General Body organization and anatomic terminology
- 2. Cellular structure and function including cell division
- 3. Cell membrane structure, mechanisms of membrane transport and factors affecting membrane permeability, functional fluid compartments
- 4. Basic biochemistry including structure and synthesis of the four groups of macromolecules, enzyme structure and function, the role of water, pH
- 5. Cellular metabolism including aerobic respiration and protein synthesis
- 6. General histology of four basic tissue groups
- 7. Integumentary system
- 8. Musculoskeletal system including arthrology and fundamental musculoskeletal mechanics
- 9. Nervous system including special senses
- 10. Proper use of microscope, other lab equipment, and lab techniques

<u>Course Outline:</u> (example class schedule)

- Unit 1: Week 1 General body organization, terminology, fluid compartments Lab: intro, safety, graphing, solutions
 - Week 2 Biological chemistry: water, pH, macromolecules, aerobic respiration Lab: metabolism tutorial
 - Week 3 Cell structure, cell division, basic histology (epithelium, connective tissues) Lab: Cell division, basic tissues, microscopy
 - Week 4 Membrane transport, osmosis, tonicity

Lab: osmosis lab

Unit 2: Week 5 – Bone, cartilage tissues; axial skeleton

Lab: bone, axial skeleton

- Week 6 Skeletal system: appendicular Lab: appendicular skeleton
- Week 7 Arthrology, surface anatomy
 - Lab: review skeletal system
- Unit 3: Week 8 Muscle tissue, membrane potentials, action potentials, neuromuscular junction Lab: muscle microanatomy, axial muscles; membrane potentials tutorial
 - Week 9 Muscle contraction, muscle gross anatomy Lab: muscles of the extremities
 - Week 10 Muscle gross anatomy Lab: review muscles; EMG demonstration
- Unit 4: Week 11 Nervous system: integration (CNS)
 - Lab: nerve tissue microanatomy, CNS gross anatomy
 - Week 12 Nervous system: efferent (motor, ANS) Lab: PNS, ANS
 - Week 13 Nervous system: afferent (sensory) Lab: sensory systems lab
 - Week 14 Nervous system: special senses Lab: anatomy of special sense organs Week 15 – Review for finals

Textbooks / Equipment:

- a. <u>Textbook:</u> Anatomy & Physiology: an integrative approach, McKinley, M.P., O'Loughlin, V.D., and Bidle, T.S.. McGraw Hill, New York, New York (2013)
- b. Laboratory Manual: <u>Saladin Anatomy & Physiology: The Unity of Form and Functio</u>, 6th ed. Wise, E., McGraw Hill, New York, NY (2011)
- c. Other required equipment/supplies: dissecting kit, goggles
- d. <u>Recommended resources:</u> Textbook online resources: Anatomy & Physiology revealed; P.H.I.L.s (Physiology interactive lab simulations)

Evaluation: Exams, Quizzes, Final grades

- a. Lecture: (75-80% of final grade) to include unit tests & a final exam as well as homework/quizzes
- Lab grade: (20-25% of the final grade) Lab exams will include practical exams over anatomy;
 note: students must pass the lab portion of the course with a 60% or above in order to pass the overall course

.

learning as well as analysis of the current state of the discipline.

This course has been added to meet a need to serve the Nursing Program. Current Nursing students are required to take BIOL 3074, but enter this upper division course with a weak biology background, placing them at a disadvantage to students with a stronger biology background (Biology majors). The proposed course will provide the Nursing students with the needed anatomical and physiological background by presenting the physiological material at a more appropriate level of detail.

How will the effect of the change be monitored in ongoing program assessment?

Course grades will be monitored as well as student performance in Pathophysiology (BIOL/NUR 3803), which requires this course as a prerequisite.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached.

See attached.

Proposed New Course Syllabus

Course subject, number, title: BIOL 2414: Human Anatomy and Physiology II

Catalog Course Descriptions:

This course is the second in a two semester sequence that covers the basic structure and function of human organ systems including mechanisms of homeostasis. Specific topics include: the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary and reproductive systems as well as principles of immunity, genetics, metabolism, fluid and electrolyte balance, and acid-base homeostasis. Laboratory sessions involve dissection, microscopy, demonstration and/or experimental modeling of concepts. <u>Pre-requisites:</u> Completion of A&P I (BIOL 2404) with a "C" or better or permission of instructor. Lecture three hours, laboratory two hours. \$20 lab fee.

<u>General Education Goals</u>: This course presents basic information about Human Anatomy and Physiology necessary for satisfactory performance in subsequent courses for general biology, nursing or allied health fields. Specific course content is designed to help provide a foundation in the application of scientific and quantitative reasoning, critical thinking, and effective communication; thereby addressing 3 of the ATU General Education Goals.

Course Objectives:

Human Anatomy & Physiology II (BIOL 2414)

Upon successful completion of this course, students should be able to recognize, describe, explain and/or apply knowledge and understanding to the following:

- 1. Endocrine system
- 2. Cardiovascular system, including blood tissue
- 3. Lymphatic system, including basic immune functions
- 4. Respiratory system
- 5. Urinary system
- 6. Reproductive system
- 7. Integrative topics include: metabolism and nutrition, fluid and electrolyte balance, acid/base homeostasis, and thermoregulation

.

8. Proper use of microscope, other lab equipment, and lab techniques

<u>Course Outline</u>: (*example class schedule*)

- Unit 1: Week 1 Endocrine system and control pathways
 - Lab: anatomy of endocrine organs; modeling control pathways
 - Week 2 Cardiovascular system: heart, blood vessels Lab: CV gross anatomy
 - Week 3 Blood, Cardiovascular physiology
 - Lab: histology myocardium, blood vessels, blood tissue
 - Week 4 Cardiovascular physiology

- Lab: ECG, blood pressure lab
- Unit 2: Week 5 Lymphatics, Immunology Lab: blood typing
 - Week 6 Respiratory system Lab: Respiratory anatomy
 - Week 7 Respiratory physiology, spirometry demonstration Lab: exercise and pO2 lab
- Unit 3: Week 8 Digestive system
 - Lab: digestive system anatomy
 - Week 9 Digestive system physiology Lab: Digestive enzyme lab
 - Week 10 Nutrition, metabolism, temperature homeostasis Lab: Glucose curve lab
- Unit 4: Week 11 Urinary system anatomy Lab: urinary system anatomy
 - Week 12 Renal physiology Lab: urinanalysis, filtration lab
 - Week 13 Water, electrolyte, acid/base homeostasis
 - Lab: renal homeostasis process mapping
 - Week 14 Reproductive system Lab: Reproductive anatomy; patterns of human inheritance Week 15 – Reproductive system / review for finals

Textbooks / Equipment: (note: same book and equipment as A&P I)

- a. <u>Textbook:</u> <u>Anatomy & Physiology: an integrative approach</u>, McKinley, M.P., O'Loughlin, V.D., and Bidle, T.S.. McGraw Hill, New York, New York (2013)
- Laboratory Manual: <u>Saladin Anatomy & Physiology: The Unity of Form and Functio</u>, 6th ed.
 Wise, E., McGraw Hill, New York, NY (2011)
- c. Other equipment/supplies: dissecting kit, goggles
- d. <u>Recommended resources:</u> Textbook online resources: Anatomy & Physiology Revealed; P.H.I.L.s (Physiology Interactive Lab Simulation)

Evaluation: Exams, Quizzes, Final grades

- a. Lecture: (75-80% of final grade) to include unit tests & a final exam as well as homework/quizzes
- b. <u>Lab grade</u>: (20-25% of the final grade) Lab exams will include practical exams over anatomy; *note:* students must pass the lab portion of the course with a 60% or above in order to pass the overall course

Unit	Week	Lecture topic	Lab topic	Virtual physiology
	1	General body organization, terminology		exercises
	2	Biological chemistry: water, pH, macromolecules, aerobic respiration	Intro to lab, lab reports, graphing, solutions	Metabolism tutorial
	3	Cell structure, cell division, basic histology	Cell division, basic tissues microanatomy	
	4	Membrane transport	Osmosis lab	
2	5	Bone, Cartilage Tissues; Axial skeleton	Bone, Axial skeleton	
	6	Skeletal system: Appendicular	Appendicular skeleton	
	7	Arthrology, Surface anatomy	Review skeletal system	
3	8	Membrane Potentials, Action potentials, muscle tissue	Muscles: axial	Membrane potentials tutorial
	9	Muscle Contraction, Muscular anatomy	Muscles: extremities	
	10	Muscular anatomy	Review muscles; EMG demonstration	
4	11	Nervous system: Integration (CNS)	Nervous system: CNS	
	12	Nervous system: Motor, ANS	Nervous system: PNS, ANS	
	13	Nervous system: Sensory	Sensory systems lab	
	14	Nervous system: Special senses	Sensory anatomy	
	15	Review for finals

Catalog Course Descriptions:

Human Anatomy and Physiology I (BIOL 2404)

This course is the first in a two semester sequence that covers the basic structure and function of human organ systems including mechanisms of homeostasis. Specific topics include: body organization, basic biochemistry, cell biology including metabolism, histology, and the Integumentary, Skeletal, Muscular, and Nervous systems. Laboratory sessions involve dissection, microscopy, demonstration and/or experimental modeling of concepts. <u>Pre-requisites:</u> Grade of "C" or better in Survey of Chemistry (CHEM 1114) or Intro to Biology (BIOL 1014); ACT of 19 or above on Math section or completion of Intermediate Algebra (MATH 0903) with a "C" or better. Lecture three hours, laboratory two hours. \$10 lab fee.

Human Anatomy and Physiology II (BIOL 2414)

This course is the second in a two semester sequence that covers the basic structure and function of human organ systems including mechanisms of homeostasis. Specific topics include: the Endocrine, Cardiovascular, Lymphatic, Respiratory, Digestive, Urinary and Reproductive systems as well as principles of immunity, genetics, metabolism, fluid and electrolyte balance, and acid-base homeostasis. Laboratory sessions involve dissection, microscopy, demonstration and/or experimental modeling of concepts. <u>Pre-requisites:</u> Completion of A&P I (BIOL 2404) with a "C" or better. Lecture three hours, laboratory two hours. \$10 lab fee.

Course Rationale: This course presents basic information about Human Anatomy and Physiology necessary for satisfactory performance in subsequent courses for general biology, nursing or allied health fields.

<u>General Education Goals</u>: Specific course content is designed to help provide a foundation in the application of scientific and quantitative reasoning, critical thinking, and effective communication; thereby addressing 3 of the ATU General Education Goals.

Course Objectives:

Human Anatomy & Physiology I (BIOL 2404) Upon successful completion of this course, students should be able to recognize, describe, explain and/or apply knowledge and understanding to the following:

- 1. General Body organization and anatomic terminology
- 2. Cellular structure and function including cell division
- 3. Cell membrane structure, mechanisms of membrane transport and factors affecting membrane permeability, functional fluid compartments
- 4. Basic biochemistry including structure and synthesis of the four groups of macromolecules, enzyme structure and function, the role of water, pH
- 5. Cellular metabolism including aerobic respiration and protein synthesis
- 6. General histology of four basic tissue groups
- 7. Integumentary system
- 8. Musculoskeletal system including arthrology and fundamental musculoskeletal mechanics
- 9. Nervous system including special senses
- 10. Proper use of microscope, other lab equipment, and lab techniques

This course is the second in a two semester sequence that covers the basic structure and function of human organ systems including mechanisms of homeostasis. Specific topics include: the Endocrine, Cardiovascular, Lymphatic, Respiratory, Digestive, Urinary and Reproductive systems as well as principles of immunity, genetics, metabolism, fluid and electrolyte balance, and acid-base homeostasis. Laboratory sessions involve dissection, microscopy, demonstration and/or experimental modeling of concepts. <u>Pre-requisites:</u> Completion of A&P I (BIOL 2404) with a "C" or better. Lecture three hours, laboratory two hours. \$10 lab fee.

Course Rationale: This course presents basic information about Human Anatomy and Physiology necessary for satisfactory performance in subsequent courses for general biology, nursing or allied health fields.

<u>General Education Goals</u>: Specific course content is designed to help provide a foundation in the application of scientific and quantitative reasoning, critical thinking, and effective communication; thereby addressing 3 of the ATU General Education Goals.

Course Objectives:

Human Anatomy & Physiology I (BIOL 2404) Upon successful completion of this course, students should be able to recognize, describe, explain and/or apply knowledge and understanding to the following:

- 1. General Body organization and anatomic terminology
- 2. Cellular structure and function including cell division
- 3. Cell membrane structure, mechanisms of membrane transport and factors affecting membrane permeability, functional fluid compartments
- 4. Basic biochemistry including structure and synthesis of the four groups of macromolecules, enzyme structure and function, the role of water, pH
- 5. Cellular metabolism including aerobic respiration and protein synthesis
- 6. General histology of four basic tissue groups
- 7. Integumentary system
- 8. Musculoskeletal system including arthrology and fundamental musculoskeletal mechanics
- 9. Nervous system including special senses
- 10. Proper use of microscope, other lab equipment, and lab techniques

Human Physiology (BIOL 3074) (proposed changes in course description and objectives to reflect difference between this upper division Physiology class and planned new course, A&P I, and A&P II.)

<u>Current Catalog Course description</u>: Prerequisites: C grade or better in BIOL 2014 (Human Anatomy) and in CHEM 1114 (Survey of Chemistry) or 2124 (General Chemistry). An introduction to the function of vertebrate body systems, i.e., muscle action, digestion, circulation, nervous control, endocrine, metabolism and respiration, with special emphasis on the human body. Lecture three hours, laboratory two hours. \$10.00 lab fee.

Proposed revised Catalog Course Description:

This course covers the physiology of human organ systems including integrated mechanisms of homeostasis and metabolism. Weekly laboratory sessions involve demonstration and/or experimental modeling (physical or virtual) of course concepts. Pre-requisites: Grade of "C" or better in Human Anatomy (BIOL 2014) or Comparative Anatomy (BIOL 3014), and Principles of Biology (BIOL 1114) or Introduction to Biology (BIOL 1014), and one semester of General Chemistry (CHEM 2124). Lecture three hours, laboratory two hours weekly. \$10.00 (increase this to \$20.00 if funds can be designated to use in A&P lab?)

General Education Goals: Specific course content is designed to help to provide a foundation in the application of scientific and quantitative reasoning, critical thinking, and effective communication; thereby addressing 3 of the ATU General Education Goals. *(ck current gen. ed. goals)*

Course Rationale: This upper division course presents information about Human Physiology necessary for satisfactory performance in subsequent courses in the Biology curricula and Pre-professional programs (eg: pre-med, pre-vet, pre-dental, pre-pharmacy, pre-physical therapy).

Course objectives: Upon successful completion of this course, students should be able to recognize, describe, explain and/or apply knowledge and understanding to the following:

- 1. Cell structure and function, including mechanisms of cell division and destruction
- 2. Cell membrane structure and function, including mechanisms of membrane transport, factors affecting membrane permeability, principles of osmosis, functional fluid compartments
- 3. Structural and functional classification of tissues
- 4. Basic biochemistry: structure and function of macromolecules, the role of water, pH,
- 5. Structure and function of enzymes and enzyme activity, including the Induced fit model of protein interaction. Explain the role of this specificity in membrane permeability, endocrine control, neurotransmission and drug activity.
- 6. Describe the major metabolic pathways that produce ATP and synthesize other important cellular components and products (eg: glycogen, lipids, proteins), explain how energy is transferred (eg: via redox reactions)
- 7. Describe 4 cell receptors and their signal transduction system

Human Physiology (BIOL 3074) (proposed changes in course description and objectives to reflect difference between this upper division Physiology class and planned new course, A&P I, and A&P II.)

Current Catalog Course description: Prerequisites: C grade or better in BIOL 2014 (Human Anatomy) and in CHEM 1114 (Survey of Chemistry) or 2124 (General Chemistry). An introduction to the function of vertebrate body systems, i.e., muscle action, digestion, circulation, nervous control, endocrine, metabolism and respiration, with special emphasis on the human body. Lecture three hours, laboratory • two hours. \$10.00 lab fee.

Proposed revised Catalog Course Description:

ч

This course covers the physiology of human organ systems including integrated mechanisms of homeostasis and metabolism. Weekly laboratory sessions involve demonstration and/or experimental modeling (physical or virtual) of course concepts. Pre-requisites: Grade of "C" or better in Human Anatomy (BIOL 2014) or Comparative Anatomy (BIOL 3014), and Principles of Biology (BIOL 1114) or Introduction to Biology (BIOL 1014), and one semester of General Chemistry (CHEM 2124). Lecture three hours, laboratory two hours weekly. \$10.00 (increase this to \$20.00 if funds can be designated to use in A&P lab?)

Arkansas Tech University Health Information Management Program

Course: HIM 4203 Healthcare Reimbursement

- Instructor: To Be Determined Dean Hall Suite 201, 402 West O Street Phone: E-mail: Office hours:
- Description: This course covers the various systems used for reimbursement methods in a range of healthcare facility types. A review of the regulations and role of coding systems surrounding healthcare reimbursement will also be investigated.
- Prerequisite: HIM 3033 Basic Coding Principles and HIM 4034 Advanced Coding Principles
- Text: Casto & Layman, Principles of Healthcare Reimbursement, 3rd ed., 2011 (required)
- Bibliography (supplemental reading): Journal of the American Health Information Management Association
- Objectives: At the end of the course, the student will have a working understanding of the following AHIMA Domains and Subdomains:

Domain I: Health Data Management

1.11

Clinical Classification Systems

- Implement and manage applications and processes for clinical classification and coding
- Maintain processes, policies, and procedures to ensure the accuracy of coded data

Reimbursement Methodologies

- Manage the use of clinical data required in prospective payment systems (PPS) in healthcare delivery
- Manage the use of clinical data required in other reimbursement systems in healthcare delivery
- Participate in selection and development of applications and processes for chargemaster and claims management
- Implement and manage processes for compliance and reporting
- Participate in revenue cycle management

Learning Objectives: See the Learning Objectives listed at the beginning of each chapter.

 $t^+ c$

Evaluation: Grades for this course will be assigned according to performance on lab assignments, homework and exams. Each assignment/exam will be weighted appropriately. Attendance and class participation may also be taken into consideration as a part of your grade.

At the time assignments are made, the instructor will notify students of date due. Students are responsible for turning papers in on time. Assignments turned in late will be accepted, but the grade will be lowered 5% for each weekday the assignment is late. You must contact the instructor <u>prior</u> to an examination if an examination will be missed. Make-up exams will be given at the discretion of the instructor and the final grade will be lowered 10% automatically.

The following grading scale will be used in all HIM courses:

- A 92-100
- B.....84-91
- C 75-83
- D....65-74
- F 64 0

1 · ·

A grade of "C" or better must be earned in all HIM courses in order to complete graduation requirements.

Attendance Policy: Students in the Health Information Management Program are being trained for professional positions in the health care environment. Accountability and reliability are important attributes of the successful professional. The student is expected to attend class. Excessive nonuniversity-excused absences (more than one per credit hour) will result in the student's grade being lowered one percentage point per absence. This attendance policy is also applicable to any required meetings outside of class time, to include ArHIMA seminars or convention or any other professional meeting or seminar required by the instructor(s). Students with 7 absences will be dropped from class.

Example: HIM 4073 – student is absent 4 times. Final grade is 90%. Student will receive 89% for a final grade.

Ethics: Unethical behavior will not be tolerated and is subject to disciplinary action or possible expulsion from the HIM program and/or TECH, as detailed in the TECH Student Handbook. Due process is outlined in the TECH Student Handbook. Each student must do his/her own work on examinations, assignments, and projects and maintain confidentiality of classroom discussions and information gained from all aspects of the

14

educational experience, regardless of the setting. No cheating or plagiarism will be tolerated.

Classroom Courtesy: Please turn cell phones off during class time. It is disruptive when phones ring and not appropriate to talk on the phone or text during class time. Students that text or otherwise do not pay attention during class will be counted absent.

No change.

New Cross-list:

□ Adding Cross-listing □ Changing Cross-listing □ Deleting Cross-listing If adding or changing cross-listing, indicate course subject and number _______ No change.

New Prerequisite (list all, as you want them to appear in the catalog): No change.

New Co-requisite (list all, as you want them to appear in the catalog): No change.

□Elective XMajor □Minor If major or minor course, you must complete the Request for Program Change form.

Please provide a rationale for the change including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

The current course of two credit hours was put in place a number of years ago. Since that time, more emphasis has been placed on research in the field of health information management. Instead of using a few chapters in an older text, a complete text is required to cover all of the areas. This is also evidenced by the amount of Knowledge Clusters that programs are required to teach to students to meet accreditation standards as well as prepare them for the national credentialing exam (Registered Health Information Administrator). The amount of material is no longer fitting within a two hour course and necessitates expansion to a three hour course.

How will the effect of the change be monitored in ongoing program assessment?

The current monitoring system will be continued. This includes assessing feedback from graduates and employers. Performance in this area on the national credentialing exam will also be monitored to assess the scores students achieve. Another assessment indicator is to monitor the types of jobs available to graduates of this program. As the healthcare environment changes, there are more positions requiring research skills.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

No other department will be impacted with this change.

Arkansas Tech University PROPOSAL FOR CHANGE IN PROGRAM

RECEIVED

OCT - 1 2012

TO: Curriculum Committee

Registrar's Office

FROM: Biological Science Department – Health Information Program

DATE SUBMITTED: September 5, 2012

REQUEST FOR CHANGE IN PROGRAM (Modification)

Title	Signature	Date
Department Head	Charly Hogen.	4-27-12
Dean	Juf W Rath	2012 Sept RE
Registrar	Sammylevals	10/1/12
Vice President for Academic Affairs	0	

Health Information Management Summer I. 2013	Program Title:	Effective Date:
	Health Information Management	Summer I, 2013

Outline change in program and attach curriculum matrix:

1) Addition of new course, HIM 4203 Healthcare Reimbursement

2) Change in hours of current course from HIM 4092 to HIM 4093 Research in Health Information Management

2) Reduction in elective hours to accommodate additional four hours in required coursework.

3) Changes in sequencing to accommodate new course.

What impact will the change have on staffing, on other programs and space allocation?

These changes will not impact staffing, any other programs or space allocation. Existing faculty have been teaching courses for the Medical Assistant Program. This program will no longer be offered on the Russellville campus after this year and existing faculty have expertise in the courses affected by the proposed changes.

Please provide a rationale for the need for this new course including the evidence derived from your program assessment.

The HIM Program conducts annual surveys of graduates and employers of the Program as they begin working in the field. The feedback received over the past few years has overwhelmingly indicated the need for more instruction and studies in the area of healthcare reimbursement. This is mirrored in the fact that federal legislation has introduced a number of new initiatives in this area. Additionally, the American Health Information Management Association (which administers the national credentialing exam taken by HIM graduates) has added a large amount of Domains and Subdomains that the graduates will be required to know to be successful on the national credentialing exam (Registered Health Information Administrator).

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

Addition of this course will not impact any other departments.

.

In the attached matrix, outline in specific detail how your proposal will alter the program (include course number and title)

Theoretical Competency

ARKANSAS TECH UNIVERSITY Department of Nursing

Course Number: NUR 3792

Course Title: Theoretical Competency \mathcal{I}

Credit Hours: Two (2) Hours

Contact Hours: Varies

Course Faculty:

Level Coordinator

Course Description:

This course is a theory course designed to enable a student to prove theoretical competence. Students who have failed a junior level practicum course but have passed the accompanying theories and concepts course must prove theoretical competence in order to progress to the next level. For the student who has failed, NUR 3792 would be taken the same semester that the student is repeating the accompanying practicum course. Students who have been absent from the upper division of the nursing curriculum must prove theoretical competence at the level of the corresponding theory class.

Course Objectives:

The objectives of the theory course (NUR 3204 and NUR 3606) for which the student is attempting to prove competency.

Student Responsibility:

The student is required to contact the level coordinator responsible for Theoretical Competency on the first day of class. Theory Competency requirements will be provided by the level coordinator at the beginning of the semester.

> Spring 2011 Carey Bosold MSN, FNP-BC

ARKANSAS TECH UNIVERSITY

	ugii Pharmacology Review	Received by the Registrar's Office
Course:	NUR 4991 Special Problems in Nursing	APR 1 3 2012
Course Title:	The Basic Principles of Pharmacology	
Credit Hours :	One Semester Hour	
Contact Hours :	2-3 Clock Hours Per Week	
Placement:	Upper Level Nursing	
Faculty:	Carey Bosold MSN, FNP-BC	
Course Descrip Pharmacolo Prerequisite: De Justification/Ra Relationship to	tion: One hour credit course that fevieu gy, medication administration and drug partmental permission. Upper division util nursing student and stionale for NUR 4991: 4971 Mission:	us basic calculations lizing dimensional zlysis,

This course directs students in the achievement of all statements (one - seven) of the Department of Nursing Mission.

Relationship to Program Outcomes:

By the completion of this course, the learner progresses toward Program Outcomes, (one-five).

Course Objectives:

ł

٩ '

Upon completion of this course, the student will be able to:

- 1. Define common related terms, list important historical events in the field of pharmacology, and discuss significant drug legislation that guides nursing practice and protect individuals receiving medications.
- 2. Discuss the process through which a drug must go as it is being developed and tested for human safety and define the role of the nurse in experimental drug studies.
- 3. Describe the three phases of drug activity in the body: the pharmaceutical phase, the pharmacokinetic phase, and the pharmaotherapeutic phase.
- 4. Identify various types of responses that individuals may have to drugs and the eight factors that influence these responses.
- 5. Describe the steps used in the dimensional analysis approach to problem solving.
- 6. Identify the appropriate conversion factors needed to solve specific drug calculation problems.
- 7. Set up dosage calculations using the dimensional analysis method.
- 8. Solve intravenous infusion problems using dimensional analysis.

Relationship to General Objectives:

APR 1 3 2012

This upper division professional nursing course provides opportunities for the student to integrate knowledge and skills from the general education component with nursing theories and concepts. The course serves as a review that integrates all general education outcomes with the Department of Nursing outcomes.

Evaluation:

- 1. Grading Scale
 - A = All assignments completed on time
 - C = All assignments completed but not on time
 - F = Incomplete
- 2. A grade of "I" may be recorded for a student whose work is incomplete due to circumstances beyond the student's control. The student must take responsibility for removal of the incomplete grade according to the Arkansas Tech University's catalog requirements.

Assignment:

The EDGT (Education Global Technologies, Inc.) *Basic of Pharmacology* and *Math Magic for Meds II* can be accessed by the student once enrolled in the course and the access code is provided by the instructor. You must complete Modules I-IV and take the four unit test found in Module V for each program. Your score for each exam must be **80% or higher** to be considered complete. You can take the test as many times as necessary to achieve the passing score.

You do not need to print off your results. Once the assignments are complete, email the course instructor and a grade will be recorded in Blackboard.

All students are expected to enroll in Blackboard on the first day of class each semester for further instructions.

Policies

- a. The student is expected to conduct himself/herself in a professional manner during the independent study activities.
- b. Students are expected to:
 - 1) Present written work which is theirs alone.

Conduct of the Course

Guidelines:

Criteria for Credit

It is expected that each student will spend 2-3 hours per week on the scheduled assignments.

Registrar's Office

APR 1 3 2012

Arkansas Tech University Department of Nursing

Course Number: NUR 3911- 4981

Course Title: Overview of Oncology Introduction to Oncology

Semester Credits/ Credit hours: 1 hour

Lecture Hours: Combination on-line and face-to-face classroom (TBA)

Faculty name: Wanda Christie, MNSc, RN, OCN

Faculty contact information:

wchristie@atu.edu Room 222, Dean Arkansas Tech University Russellville, AR 72801 Office hours: by appointment Office phone: (479) 964-0864 Cell phone: (479) 970-0494 Home phone: (479) 968-1826

Prerequisites/ Co-requisites:

Course Description:

This course is an overview of the different aspects of treatment of patients with cancer. It will include a short synopsis on the cellular changes that occur with cancer, the different preventives and diagnostics that are done, the modalities of treatment and management of side effects of treatment, as well as the emotional and psychological impact of cancer on the patient and their significant others. The course builds upon and expands core knowledge of human anatomy, physiology, and psychology.

Justification Rationale for the Course:

This course directs the students in the achievement of statements one, two, three, and five in the Department of Nursing's Mission.

Relationship to Program/Mission Outcomes:

- 1. Relationship to Program Outcomes By the completion of this course, the learner will progress toward Program Outcomes 1, 2, and 4.
- 2. Relationship to General Education Objectives

The knowledge and skills acquired through successful completion of this course will enable students to understand and appreciate the importance of communication, abstract thinking, global issues, historical perspectives and the social and governmental processes. Course Objectives: Upon completion of this course students will be able to:

- 1. Describe basic cellular changes that occur with cancer.
- 2. Define common terminology used in diagnosing and treating oncology patients.
- 3. Explain the common tests used in diagnostic settings.
- 4. Discuss different modalities of treatments.
- 5. Identify common chemotherapy drugs.
- 6. Explain and compare how different drugs and treatments work during the cell cycle.
- 7. Discuss common side effects of treatment, including the care of the patient.
- 8. Understand the psychological impact of cancer on the patient and family.

Required titles:

i

- No text required (provided on Blackboard)
- Selected Readings provided online.

Course Policies:

Attendance Policy:

Attendance is required for this class. The attendance may be by Blackboard or classroom setting, depending on week. Some face to face class time is required, and these times will be determined during the first meeting time. If the student is unable to attend a scheduled face to face class session, then time can be made up by assignments on Blackboard. I expect each student to be responsible for checking Blackboard 2 to 3 times weekly as grades and announcements will be posted on the Blackboard site. Attendance for Midterm test and Final is mandatory.

Student Evaluation/ Grading Policies:

The grade will be determined by the following:

Attendance (online & class)	20%
Midterm test	40%
Final test	40%
	100%
Grading scale:	
90-100 points = A	
80-89.9 points = B	
75-79.9 points = C	
68-74.9 points = D	
67.9 points and below = F	

Grades will be posted on Blackboard for you to see as work is graded. Any grade below 75% will not be rounded up. A grade in "I" may be recorded for a student whose work is incomplete due to circumstances beyond the student's control. This grade will be assigned at the discretion of the instructor according to the amount of time missed, the ability of the student to complete the necessary assignments, and the quality of the student's previous work. The student must take responsibility for removal of the incomplete grade according to the Arkansas Tech University's catalog requirements.

Examination Policy:

Testing dates will be announced according to university testing policy.

Expectations of Students:

You will find your assignments under Course Schedule. Each week will have an individual Module devoted to the topic(s). Please be sure to look at this, as there will be specific information you need to know about. NUR 3911 S12

Required Textbook:	Gerontological Nursing 7th edition
_	Charlotte Eliopoulos
	ISBN 0-7817-5344-9
	Publisher: Lippincott Williams & Wilkins

Optional:

Pocket Guide to APA Style 3rd Edition Robert Perrin ISBN 0-547-20193-1 Or APA Manual (you should already have)

Healthy People 2020 http://www.health.gov/healthypeople/ (all information is on the website)

Computer Requirements: Please refer to the Blackboard login page for computer requirements. For this course we will utilize search engines, Microsoft Word, and Real Player (a free link is provided to view any videos during your course work).

Justification/Rationale for the Course:

A. Relationship to ATU's Mission

This course relates to ATU's mission of providing opportunity for nurturing scholastic development, integrity, and professionalism in ATU students by preparing nurses for the changing age of the population for which they will provide care during their career.

APR 1 3 2012

B. Relationship to Nursing Program's Mission

This course relates to program mission statement one: Provide an intellectual climate that fosters the development of critical thinking to prepare a graduate who is professional, caring, competent, and self-directed in providing therapeutic nursing intervention and demonstrates an interest in life-long learning.

Course Objectives:

Upon completion of this course, the student will be able to:

- 1. Describe characteristics of the current elderly population and discuss projected changes in the population in the future.
- 2. Discuss theories related to aging.
- 3. Explain the nurse's role in relation to health promotion and health maintenance.
- 4. Analyze the role changes of the aging individual.
- 5. Identify normal aging changes and discuss health care needs and modifications.
- 6. Demonstrate assessment tools and strategies for assessment of the aging individual.
- 7. Discuss implications of legal and ethical issues which impact the aging individual and their families.
- 8. Synthesize research and informational websites regarding aging and nursing.
- 9. Explore how policy and economics affect health services available to the aging and their families.

Grading Scale

90-100%= A 80-89%= B 75-79%= C 68-74%= D <68= F

APR 1 3 2012

Course Grading

Online Participation	20%
Assignments	15%
Quizzes (online)	20%
Consultant Reports	20%
Exams	25%

Attendance Policy: Students must sign in and complete the first assignment by the due date. If a student does not participate in the first assignment they will be dropped from the course at the discretion of the instructor. Assignments received after the due date will result in a letter grade deduction or points equivalent to a letter grade for that assignment.

Discussion Board Participation:

A total of 5 points can be earned for each discussion board assignment.

5 pts:	Answers the question in its entirety Provides reference in APA format Responds to two other classmates and references comment Meets Due Date	
4pts:	Answers the question in its entirety Responds to two other classmates Meets Due Date	
2.4.1		
3pts or less:	Does or does not Answers the question in its entirety	
	Does or does not Provides reference in APA format	
	Does or does not Responds to two other classmates	
	Does or does not Meets Due Date	

Policies: Falsification of your participation and attendance into this online course will result in an automatic failure and will be turned over for further academic discipline. All exams will not be copied or printed for any use. Exams are not a collaborative process. Academic Dishonesty will not be tolerated and will result in a failure for this course. Plagiarism will not be tolerated. Please refer to your student handbook for further guidelines and explanations.

Teacher Role: Resource Person, Facilitator, and Evaluator

Student Role: Learner, Communicator, Advocator, and Facilitator

Teaching/Learning Strategies: This course may include discussion boards, chat room discussions, web browsing and search engine use. Written assignments implementing APA

Registrar's Office

APR 1 3 2012

format will be required. Written assignments will be uploaded to the assigned location in Black Board. This course will focus on collaborative learning through the use of discussion groups. It is required that each student respond to two (2) postings other than their own for minimal participation in the discussion boards. Other learning strategies may include but are not limited to interviews, case studies, videos, and scholarly research.

APR 1 3 2012

PROMOTING WELLNES IN AGING FAMILIES

Module I

Who are the Aging? Demographics & Cultural Issues

Objectives:

The student will be able to:

- 1. Describe characteristics of today's elderly population in regard to:
 - Life expectancy
 - Gender, race differences
 - Marital status
 - Living arrangements
- 2. Discuss projected changes in future generations of elders.
- 3. Describe the unique views of health and attitudes toward the aged of these groups; Black Americans
 - Native Americans Jewish Americans Asian Americans Hispanic Americans
- 4. Identify ways in which nursing care may need to be modified to accommodate persons of diverse ethnic backgrounds.

Assigned reading:

Eliopoulos (7th Edition) Chapters 1, 2, 3, 4, 5, 6, & 7

Presentation to review:

Introduction to Aging - attached powerpoint

Document to review:

Arkansas State Plan on Aging (attached under Who are the Aging?)

Web Sites to review:

Administration on Aging AoA - Statistics - A Profile of Older Americans Administration on Aging - Statistics Cultural Issues in Home Care article

Evaluation:

Complete online quiz titled Introduction to Aging and Demographics.

Tammy Rhodes	Juningcallas	10/1/12
Vice President for Academic Affairs	0	
Dr. John Watson		

Program Title: Baccalaureate Nursing and Nursing Curriculum for Registered Nurse	Effective Date: Fall 2013
Detail change in program:	
Change Anatomy and Physiology to new combined would encourage students to take the combined c	format or separate courses in our degree plan. We ourse but would also allow stand alone courses.
Please provide a rationale for the change.	
Proposed by Biological Sciences to allow courses to	be fully transferable with other institutions.
What impact will the change have on staffing, on c	ther programs and space allocation?
No changes for department	
If this course will affect other departments a Depa must be attached.	rtmental Support Form for each affected department
Proposed changes from Biological Sciences. This w	ill allow easier transfer of courses for nursing
students. Keeping the option of either A&P I and II options for students in a course that frequently clo	or Anatomy and Physiology will provide more uses due to capacity.

In the Curriculum in baccalaureate Nursing- suggested sequence of courses for LPN:

BIOL 2404 or BIOL 2014 and BIOL 2414 or BIOL 3074

For the Nursing Curriculum for Registered Nurses:

Under General Ed requirements BIOL 2404 or BIOL 2014

Under Additional Nursing requirements BIOL 2414 or BIOL 3074

Admission

Admission into lower division foundation courses is open to any Arkansas Tech University student who meets the prerequisites for each course. Nursing majors are encouraged to seek academic advising from the nursing faculty immediately upon acceptance to the University.

Admission to the upper division nursing courses is competitive and subject to evaluation by the Nursing Department's Admission and Progression Committee. Students are considered for admission the spring and fall preceding the semesters they plan to enter upper division nursing courses. All transcripts and/or credentials along with an Application to Upper Division must be submitted to the Department of Nursing by March 1 for fall admission or by October 1 for spring admission, Eligible repeating students applying for readmission must submit all materials by June 30 or January 5.

Minimum requirements for acceptance into the upper division (Level 0, preclinical) nursing courses are:

- 1. Prerequisite grade point average of 3.0 on a 4.0 scale. Students will be admitted according to the criteria for selection of upper division students.
- 2. Completion of the following courses with a grade of "C" or better in each: ENGL 1013, ENGL 1023, MATH 1113, BIOL 2014, BIOL 3054, BIOL 3074, CHEM 1113 and CHEM 1111, PSY 2003, SOC 1003, and NUR 2303. Students who attempt the 3000 and 4000 level courses listed above more than twice without achieving a "C" or better will not be considered for upper division. An attempt is "any enrollment in any course and dropping it after the first day of the 10th week of the semester for any reason, and/or failure (grade of "D", "F", or "FE") of the course.
- 3. Completion of the following courses: Social Science 3 hours, American History or Government 3 hours, Humanities - 3 hours; Fine Arts - 3 hours; Elective - 1 hour, Physical Education - 1 hour, TECH 1001. (See General Education Requirements for specific course alternatives.)
- 4. Acquisition of professional/student liability insurance, criminal background check and current certification of Basic CPR for adults, children, and mants as taught by the American Heart Association, or persons currently certified in CPR instruction. These must be renewed each year.
- 5. Initiation of Hepatitis B Vaccine series.
- 6. Any student that fails an upper division nursing course (with the exception of nursing electives), withdraws, or has a break in enrollment must apply for readmission into the nursing program by June 30 for readmission to the fall semester, or January 5 for readmission to the spring semester. To reapply, the student must complete the "Reapplication to Upper Division" form and submit a letter of intent addressing reasons for past failure and a plan of action to enhance future success within the nursing program. Readmission will be based on the availability of positions in the level to which the student is applying, letter of intent and current GPA. Should several students reapply for the same level and a limited number of positions are available. GPA ranking, in conjunction with their letter of intent will guide the committee decision-making process.
- 7. Students who have not attended Arkansas Tech University during the past year must apply for readmission to the University.
- 8. The nursing program must be completed within four years of entry into level one of the nursing curriculum.

Arkansas Tech University PS 4143 Nonprofit Governance Fall 2012

Instructor:	Mr. Jeff Aulgur	
Phone:	(479) 747-8273	
Office:	Lake Point Conference Center	
E-mail:	jaulgur@atu.edu	
Office Hours:	Monday – Friday, 9:00 a.m. – 11:00 a.m. or by appointment	

Course Description

This course examines the theoretical, philosophical, practical and ethical perspectives related to the effective management and leadership of nonprofit organizations in the twenty-first century. Upon completion of the course, the student will possess an understanding of 1) the historical development of the nonprofit sector, 2) the multiple rationales for the existence of the nonprofit sector, 3) the distinctive characteristics of nonprofit organizations, 4) the structures, processes and complexities of organizational governance shared by volunteer board members and professional staff, 5) the dynamic environment of the contemporary nonprofit organization, and 6) the current issues of importance to nonprofit decision makers.

Required Course Text

- Drucker, Peter. (1990). Managing the Nonprofit Organization: Principles and Practices. New York, NY: Harper.
- Heyman, Darian R., editor. (2011). Nonprofit Management 101. San Francisco, CA: Jossey-Bass.

Justification for the Course

Nonprofit Governance is designed to help the student understand the organizational leadership of nonprofit organizations. It focuses on the challenges for nonprofit leaders and incorporates leadership theories as they apply to nonprofit organizations. The course equips students with leadership tools and techniques to effectively lead nonprofit organizations. The class will consist of guest lecturers from nonprofit agencies, case studies, and interactive discussions. The nonprofit sector in the United States provides 5.5% of the Gross Domestic Product (GDP) and employs approximately 13.5 million individuals (approximately 10% of the country's workforce). Employees of the nonprofit sector account for 9% of wages paid in the United States.

Course Objectives

- 1. Understand the role of nonprofit organizations and the future of philanthropy.
- 2. Evaluate the effectiveness and viability of a nonprofit organization.
- 3. Assess the risk management, insurance needs and legal aspects of a nonprofit organization.
- 4. Understand the methods and complexity of nonprofit development.
- 5. Evaluate the marketing and communications efficacy of a nonprofit organization.

6. Understand the symbiotic relationship between the leadership, volunteers, governing board and the community with regards to the nonprofit organization.

7. Become familiarized with the diversity of the nonprofit community in the United States.

How Course Meets General Education Requirements

The general education curriculum at Arkansas Tech University is designed to provide a foundation for knowledge common to educated people and to develop the capacity for individuals to expand that knowledge over his or her lifetime. The University has identified a set of comprehensive goals that will allow students to accomplish these general education objectives. This course addresses the following specific Arkansas Tech University general education goals:

Communicate effectively Think critically Develop ethical perspectives Apply scientific and quantitative reasoning

Methodology

The objectives will be achieved through textbook readings, supplemental readings, on-line discussions boards, individual assignments, case study, video lectures and a group exercise. Students are required to post on the discussion board as assigned and provide feedback to peers based on the week's assignment to create an interactive dialogue. The group project requires students to collaborate on a project through the use of technology to reflect real world application.

Technology Competencies

Students are expected to demonstrate mastery and appropriate application of related technology competencies as determined by the Professional Studies Department. Those competencies include: word processing (MS Office), PowerPoint (2007 version or ability to see later version of power-point), on-line research, email, Blackboard, discussion board postings and list-serve knowledge.

Class Assignments

Class assignments will be posted every Monday by 12 p.m. CST unless noted otherwise. Class assignments can be located on Blackboard under the "Assignments" tab.

Assessments

Discussion Board

Discussion board posts regarding the assigned reading will be required from each student, as well as providing feedback to a post of at least two peers to create a dynamic, intellectual exchange. All discussion board posts will be due by 11:59 p.m. CST on the due date specified on the "Course Schedule and Assignments" section of the syllabus. All assignments must be submitted through Blackboard in order to receive credit.

Assignments

In conjunction with the reading assignments, students must complete the identified assignments for each module as assigned in Blackboard. The materials and background information for each exercise will be located in the Course Material section on Blackboard, if required.

Examinations and Quizzes

Quizzes are associated with each module and are designed to assess a student's mastery of the materials presented in a respective module. A final exam will be administered over the course material. Examinations will be timed once you begin the examination.

Group Project

The group project for this course is the selection, assessment and review of a nonprofit organization assigned by the instructor. Teams of 3-4 students collaborate to develop a comprehensive overview of the assigned nonprofit organization, culminating in a final report in PowerPoint format.

Individual Project and Peer Review

Each student will be assigned a nonprofit organization for review. The student will be provided a rubric for a 10 slide PowerPoint presentation. This presentation will be submitted to two peers and the instructor for review and grading.

E-mail/Discussion Board Decorum

This is an online course; therefore a majority of our conversations will take place through Messages within Blackboard and the assignment discussion boards. Please use common sense (no slang, use correct grammar, etc.) when sending messages and posting to discussion boards. This is an upper division level course and I expect you to be on a college student level with your postings and emails. I do not expect you to be a perfectionist, but I do expect you to be courteous and respectful. I will deduct points for poor grammar, lack of punctuation and spelling.

Grading Summary

Module 1	115 points
Module 2	110 points
Module 3	110 points
Module 4	115 points
Module 5	85 points
Module 6	165 points
Module 7	45 points
Module 8	150 points

Total Points

895 points

Grading Scale

805 points +	=	Α
716 - 804	=	В
626 - 715	=	С
537 - 625	=	D
536 and Below	=	F

Grading of Assignments

Discussion board input and participation will be evaluated weekly and grades posted within seven days of the closing date of the assignment. The assigned article review, midterm examination and case study will be graded and returned within 10 days of submission. Every effort will be made to provide you with effective and timely feedback in this course.

Make-Up Policy/Late Work

I will not accept late work unless there is an unavoidable or extenuating circumstance. I will consider each instance individually and try to work with you the best I can. It is the instructor's decision whether to award half-credit for late assignments. There is no making up on exams.

Course Policies

Academic Misconduct

University policy will be followed. At a minimum, the student (and any student caught assisting in the misconduct) will be given an automatic "F" for the test/assignment in question and possibly an "F" for the course. Subsequent cases of plagiarism will result in a minimum of one letter grade course reduction for each incident. In addition, any student who aids another student in plagiarism (e.g., provides a completed homework assignment to another student for submission) will be treated as also being involved in plagiarism and appropriate penalties will apply. Egregious cases of plagiarism (i.e., large sections copied from another source) will result in an automatic "F" for the course.

Excessive Unexcused Absences/Missed Assignments

If, at any time during the semester, you miss three assignments, you will be referred to the Tech Early Warning Program. If you are unresponsive within the following two class sessions, you will be dropped from the course by your instructor with an "F" for excessive absences or non-performance. It is your responsibility to contact the instructor when you cannot attend class or are having a problem completing an assignment.

Campus policy outlines the dates for dropping a course with a "W". If you have a failing score and do not drop before the stated deadline, you will receive an "F" on your transcript for the course; therefore, it is in your best interest to monitor your status in the course and take advantage of the opportunity to withdraw with a "W" rather than remaining in the course and receiving an "F". Tech has a very lenient withdrawal policy which allows a student to withdraw with an "W" until almost the end of the semester.

You are responsible for explaining to the instructor the reason for absences due to sickness, accident or death in the family. For absences which make it difficult for you to contact the instructor, such as an emergency, you should contact the Student Services Office, Doc Bryan Student Services Center, Room 233, (479-968-0239) to have the instructor notified.

University Testing and Disability Services

If a student has a disability that qualifies under the Americans with Disabilities Act (ADA) and requires accommodations, he/she should contact the Office of University Testing and Disability Services for information on appropriate policies and procedures. Disabilities covered by ADA may include learning, psychiatric, physical disabilities, or chronic health disorders. Students can contact the Office of University Testing and Disability Services if they are not certain whether a medical condition/disability qualifies.

Contact Information: University Testing and Disability Services Arkansas Tech University Bryan Hall, Room 103 105 W. O Street Russellville, AR 72801-2222 Voice Telephone: (479) 968-0302 Fax: (479) 968-0375 TTY Service: (479) 964-3290 Web Site: <u>http://www.atu.edu/testing/</u>

Course Schedule and Assignments

Module 1A Role of the Nonprofit in American Life (Due August 26, 2012)

- o Read Course Syllabus
- Read Chapter 1 in Heyman
- o Complete Introduction Discussion Board assignment
- o Complete Katherine Fulton TED Talk Video Review

Module 1B Leadership and the Nonprofit Sector (Due September 2, 2012)

- Read Chapters 3 and 4 in Heyman
- o Complete Simon Sinek Video Discussion Board
- o Complete Nonprofit Related Website Review Quiz
- o Complete Assignment 1B: The CEO-Board Relationship

Module 2A The Mission Comes First (Due September 9, 2012)

- o Read Drucker pp. 3-27, 45-49
- Complete Module 2A Quiz (Drucker Readings)
- o Complete Jim Collins Video Discussion Board
- o (Optional) Complete Part I of Course Self-Assessment for Extra Credit

Module 2B Strategic Planning (Due September 16, 2012)

- o Read Drucker pp. 53-71 and Heyman pp. 57-92
- o Complete Module 2B Quiz (Drucker and Heyman Readings)
- o Complete Module 2B Discussion Forum
- o Complete Module 2B Assignment

Module 3A Nonprofit Risk Management (Due September 23, 2012)

- o Read Heyman Chapter 7
- o Complete Risk Management Website/Blog Review Assignment
- Complete Module 3A Quiz (Heyman Readings)

Module 3B Nonprofit Legal Issues / Group Project Initiation (Due September 30, 2012)

- o Read Heyman pp. 161-196
- o Complete assigned reading from the Nonprofit Law Blog
- o Complete Module 3B Quiz (Heyman Readings)
- o Complete Nonprofit Law Blog Forum
- o Complete initial Group Formation and Nonprofit Selection

Module 4 Managing for Performance (Due October 14, 2012)

- o Read Drucker pp. 107-144
- Watch Melinda Gates TED Talk
- Watch "Waiting for Superman" through YouTube
- o Complete Module 4 Quiz (Drucker Readings)
- o Complete Melinda Gates TED Talk Assignment
- Complete Module 4 Forum
- o Complete Group Assignment Part 2: Nonprofit Assessment

Module 5A Nonprofit Fundraising Basics (Due October 21, 201)

- o Read Heyman pp. 287-324
- o Read Pamela Grow Blog as assigned
- Complete Module 5A Quiz (Heyman Readings)
- Complete Module 5A Forum (Pamela Grow Readings)
- o Complete Group Assignment Part 3: IRS Form 990

Module 5B Online Nonprofit Development Resources (Due October 28, 2012)

- o Read Heyman pp. 325-388
- o Review online development websites as assigned
- o Complete Module 5B Quiz (Heyman Readings)
- o Complete Module 5B Discussion Board
- o Group project collaboration on final report

Module 6A Nonprofit People and Relationship (Due November 4, 2012)

- o Read Drucker pp. 145-188
- o View Caitria and Morgan O'Neill Video (Ted Talk)
- Complete Module 6A Quiz (Drucker Readings)
- o Complete Module 6A Forum (O'Neill Video)
- o Submit Final Group Project PowerPoint and Peer Assessment

Module 6B Board and Volunteers (Due November 11, 2012)

- Read Heyman pp. 495-550
- o Complete Module 6B Quiz (Heyman Readings)
- o Begin Individual Nonprofit Review Assignments

Module 7 Marketing and Communication (Due November 18, 2012)

- o Read Heyman pp. 405-428, pp. 479-494
- o View David Damberger TED Talk
- o Complete Module 7A Quiz (Heyman Readings)
- Complete Module 7A Forum (David Damberger TED Talk)
- o Continue Individual Nonprofit Review Assignments

Module 8A Individual Nonprofit Review and Peer Review (Due November 28, 2012)

- o Submit Individual Nonprofit Review to Peer Review / Instructor (November 25)
- o Submit Peer Review Grades on Individual Nonprofit Review (Due November 29)
- o (Optional) Complete Part II of Course Self-Assessment for Extra Credit
- o Final Exam

XX Elective Minor Maior If major or minor course, you must complete the Request for Program Change form. Co-requisites: None Prerequisites: None Grading XX Standard Letter □P/F □Other (If other, please specify below) For the proposed course, attach a syllabus that includes: a. Course subject, number and title b. Course description as to appear in catalog c. Course goals and/or objectives d. Course outline e. Methods of student performance assessment and evaluation f. Course bibliography, reading list, and /or listing of other instructional media Will this course require any special resources such as unusual maintenance costs, library resources, special software, distance learning equipment, etc.? Please specify. NO Will this course require a special classroom (computer lab, smart classroom, or laboratory)? Please specify. NO How does this proposal support the University Mission or University Strategic Planning Goals? This course provides the steps and processes required to apply a practical guide to planning education and training programs for adults in a variety of settings. The program planning model presented captures and reconfigures classical and current descriptions of the program planning process. The course explores, and applies, a comprehensive 12-component model, the Interactive Model of Program Planning, with a focus on the practicality and usefulness as a technical description of the planning process, the emphasis on people being the heart of the process, and the importance of context as a centering point for action. Providing this type of course supports the "nurturing scholastic development" of the student as specified in the ATU Mission Statement. This course also supports Goal One of the ATU Strategic Plan: "Enhance the creation and delivery of first quality education

services." This course will be offered in a distance learning format.

Please provide a rationale for the need for this new course including the evidence derived from your program assessment. Numerous models of planning and education and training programs for adult learners exist, ranging from conceptual and data-based studies on program planning to how-to books and guides. This course examines, and applies, the 12 component Interactive Model of Program Planning. This model has been utilized in a variety of settings to include the corporate sector, continuing education for the professions, health care, government, community action programs, the military and religious institutions. To effectively design and deliver programs to adults, developers and trainers need an interactive and action-oriented process in which decisions and choices are made about learning opportunities for adults. Professionals in the workforce will either develop and/or deliver opportunities for adult learning and this course provides a foundation for professional success. This course offers an upper-division elective to Professional Studies majors which enhances the required professional core by developing a knowledge base deployable across all concentration areas.
How will the effect of the change be monitored in ongoing program assessment? The driving assessment component is found in the Capstone Course (PS 4003). This course, as an upper division professional studies elective, provides an opportunity to establish a foundation in a professional sector largely unaddressed in academia. The Department of Professional Studies is currently redefining the program assessment to a comprehensive model which assesses impact not only in the capstone event but across all domains of the professional core. The majority of entering Professional Studies majors lack upper-division coursework. Adult learners are more likely to succeed if the learning has relevance to their personal needs and outcomes. Upper division electives with relevance to the professional core will enhance the overall efficacy of the program. The revised departmental evaluation will incorporate a holistic assessment of the program by graduating students.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached. **N/A**

Course Description

This course provides the steps and processes required to apply a practical guide to planning education and training programs for adults in a variety of settings. The program planning model presented captures and reconfigures classical and current descriptions of the program planning process. The course explores, and applies, a comprehensive 12-component model, the Interactive Model of Program Planning, with a focus on the practicality and usefulness as a technical description of the planning process, the emphasis on people being the heart of the process, and the importance of context as a centering point for action.

Required Course Text

Caffarella, R. Program Planning for Adult Learners (2nd ed.). San Francisco, CA: Jossey-Bass, 2002.

Knowles, M., Holton, E. and Swanson, R. *The Adult Learner* (7th Ed.). San Diego, CA: Elsevier, 2005.

Suggested Reading List

1. Merriam, S., and Brockett, R. *The Profession and Practice of Adult Education*. New York, NY: Sterling Publishing Co., Inc., 1997.

Justification for the Course

This course examines, and applies, the 12 component Interactive Model of Program Planning. This model has been utilized in a variety of setting to include the corporate sector, continuing education for the professions, health care, government, community action programs, the military and religious institutions. To effectively design and deliver programs to adults, developers and trainers need an interactive and action-oriented process in which decisions and choices are made about learning opportunities for adults.

Course Objectives

- 1. Identify multiple program planning models and applying change as the primary outcome of education and training programs for adults.
- 2. Understand the Interactive Model of Program Planning and the application of its components to adult learning paradigms.
- 3. Conduct a highly structured needs assessment and develop appropriate desired training outcomes.
- 4. Describe and implement program objectives and instruction plans based on assessment.
- 5. Devise and deploy transfer-of-learning plans in a variety of environments.
- 6. Formulate evaluation plans, formally or informally, to measure the efficacy of programs.
- 7. Coordinate training logistics, to include formats, schedules, staff needs, budgeting, marketing and facilities.

How Course Meets General Education Requirements

The general education curriculum at Arkansas Tech University is designed to provide a foundation for knowledge common to educated people and to develop the capacity for individuals to expand that knowledge over his or her lifetime. The University has identified a set of comprehensive goals that will allow students to accomplish these general education objectives. This course addresses the following specific Arkansas Tech University general education goals:

Communicate effectively Think critically Develop ethical perspectives Apply scientific and quantitative reasoning

Methodology

The objectives will be achieved through textbook readings, supplemental readings, on-line discussions boards, individual assignments, case study and a group exercise. Students are required to post on the discussion board weekly and provide feedback to peers based on the week's assignment. The group project requires students to collaborate on a project through the use of technology to reflect real world application. The assigned case study allows students to develop an individualized course of action for an organization.

Technology Competencies

Students are expected to demonstrate mastery and appropriate application of related technology competencies as determined by the Professional Studies Department. Those competencies include: word processing (MS Office), PowerPoint (2007 version or ability to see later version of power-point), on-line research, email, Blackboard, discussion board postings and list-serve knowledge.

Class Assignments

Class assignments will be posted every Monday by 12 p.m. CST unless noted otherwise. Class assignments can be located on Blackboard under the "Assignments" tab.

Assessments

Discussion Board

Weekly discussion board posts regarding the assigned reading will be required from each student, **as well as providing feedback to a post of at least two peers**. All discussion board posts will be due by 11:59 p.m. CST on the due date specified on the "Course Schedule and Assignments" section of the syllabus. All assignments must be submitted through Blackboard in order to receive credit.

Weekly Exercises

In conjunction with the weekly reading assignments, students must complete the identified assignments for each week as noted in the Caffarella text. The materials and background information for each exercise will be located in the Course Material section on Blackboard, if required.

Quizzes

Quizzes are used throughout the course to evaluate student mastery of the reading material presented for any specific module(s).

Examinations

During the course a final exam will be administered over the course material. Students will be provided a 72 hour window to access the examination online. Examinations will be timed once you begin the examination.

E-mail/Discussion Board Decorum

This is an online course; therefore a majority of our conversations will take place via email and discussion board. Please use common sense (no slang, use correct grammar, etc.) when sending emails and posting to discussion boards. This is a college level course and I expect you to be on a college student level with your postings and emails. I do not expect you to be a perfectionist, but I do expect you to be courteous and respectful. In most cases, I will respond to your messages within a 24- to 36-hour period.

Grading Summary

Introduction	15 points
Module 1	100 points
Module 2	175 points
Module 3	150 points
Module 4	225 points
Module 5	200 points
Module 6	150 points
Final Exam	50 points

Total Points

1065 points

Grading Scale

936 - 1040	=	Α
832 - 935	=	В
728 - 831	=	С
624 - 727	=	D
Under 624	=	F

Grading of Assignments

Discussion board input and participation will be evaluated weekly and grades posted within seven days of the closing date of the assignment. The assigned article review, midterm examination and case study will be graded and returned within 10 days of submission. Every effort will be made to provide you with effective and timely feedback in this course.

Make-Up Policy/Late Work

I will not accept late work unless there is an unavoidable or extenuating circumstance. I will consider each instance individually and try to work with you the best I can. It is the instructor's decision whether to award half-credit for late assignments. There is no making up on exams.

Course Policies

Academic Misconduct

University policy will be followed. At a minimum, the student (and any student caught assisting in the misconduct) will be given an automatic "F" for the test/assignment in question and possibly an "F" for the course. Subsequent cases of plagiarism will result in a minimum of one letter grade course reduction for each incident. In addition, any student who aids another student in plagiarism (e.g., provides a completed homework assignment to another student for submission) will be treated as also being involved in plagiarism and appropriate penalties will apply. Egregious cases of plagiarism (i.e., large sections copied from another source) will result in an automatic "F" for the course.

Excessive Unexcused Absences/Missed Assignments

If, at any time during the semester, you miss three assignments, you will be referred to the Tech Early Warning Program. If you are unresponsive within the following two class sessions, you will be dropped from the course by your instructor with an "F" for excessive absences or non-performance. It is your responsibility to contact the instructor when you cannot attend class or are having a problem completing an assignment.

Campus policy outlines the dates for dropping a course with a "W". If you have a failing score and do not drop before the stated deadline, you will receive an "F" on your transcript for the course; therefore, it is in your best interest to monitor your status in the course and take advantage of the opportunity to withdraw with a "W" rather than remaining in the course and receiving an "F". Tech has a very lenient withdrawal policy which allows a student to withdraw with an "W" until almost the end of the semester.

You are responsible for explaining to the instructor the reason for absences due to sickness, accident or death in the family. For absences which make it difficult for you to contact the instructor, such as an emergency, you should contact the Student Services Office, Doc Bryan Student Services Center, Room 233, (479-968-0239) to have the instructor notified.

University Testing and Disability Services

If a student has a disability that qualifies under the Americans with Disabilities Act (ADA) and requires accommodations, he/she should contact the Office of University Testing and Disability Services for information on appropriate policies and procedures. Disabilities covered by ADA may include learning, psychiatric, physical disabilities, or chronic health disorders. Students can contact the Office of University Testing and Disability Services if they are not certain whether a medical condition/disability qualifies.

<u>Contact Information:</u> University Testing and Disability Services Arkansas Tech University Bryan Hall, Room 103 105 W. O Street Russellville, AR 72801-2222

Voice Telephone: (479) 968-0302 Fax: (479) 968-0375 TTY Service: (479) 964-3290 Web Site: <u>http://www.atu.edu/testing/</u>

Course Schedule and Assignments

Module 1A Planning Programs for Adults (Due September 2, 2012)

- Read Chapter 1 in Caffarella (pp. 1-19) and Chapter 1 in Knowles.
- o Complete Chapter 1 Discussion Board assignment
- Complete Assignment 1.1 Understanding the Role of Program Planners in Organizational Settings

Module 1B The Interactive Model of Program Planning (Due September 9, 2012)

- o Read Chapter 2 in Caffarella (pp. 20-36) and Knowles Chapter 2
- Complete Module 1B Discussion Board assignment
- o Complete Module 1B Quiz

Module 2A Using the Interactive Model of Program Planning (Due September 16, 2012)

- o Read Chapter 3 in Caffarella (pp. 37-56) and Chapter 3 in Knowles
- o Complete Module 2A Discussion Board assignment
- Complete Exercise 3.2 Question 2 Developing Upfront Assumptions Assignment
- o Complete Module 2A Andragogical Assignment: Patti Dobrowolski
- o Optional Extra Credit: Personal Goals and Learning Assessment Part I

Module 2B Building the Program Base (Due September 23, 2012)

- o Read Chapters 4 and 5 in Caffarella (pp. 58-111)
- o Complete Module 2B Discussion Board assignment
- o Complete Exercise 4.2 Acting in Context
- o Complete Module 2B Andragogical Exercise: The Khan Academy
- o Module 2B Quiz

Module 3A Identifying and Prioritizing Program Ideas (Due September 30, 2012)

- Read Chapters 6 & 7 in Caffarella (pp. 112-154)
- o Complete Module 3A Discussion Board assignment
- o Complete Assignment Exercise 6.2 and Assignment Exercise 7.2

Module 3B Developing Program Objectives (Due October 7, 2012)

- o Read Chapter 8 in Caffarella and the first section of Chapter 4 in Knowles
- o Complete Module 3B Discussion Board assignment
- o Complete Assignment Exercise 8.1
- o Complete Module 3B Quiz

Module 4A Designing Instructional Plan (Due October 21, 2012)

- o Read Chapter 9 in Caffarella, Chapters 13, 15 & 16 in Knowles
- o Complete Module 3A Discussion Board assignments
- o Complete Exercise 9.3 Instructional Plan Development
- Complete Module 4A Quiz

Module 4B Devising Transfer of Learning Plans (Due October 28, 2012)

- Read Chapter 10 in Caffarella and Chapter 5 in Knowles
- o Complete Module 4B Discussion Board Assignment
- o Complete Assignment Exercise 10.1
- o Complete Module 4B Quiz

Module 5A Formulating Evaluation Plans (Due November 4, 2012)

- o Read Chapter 11
- Complete Module 5A Discussion Board assignment
- Complete Assignment Exercise 11.1

Module 5B Recommendations and Results (Due November 11, 2012)

- o Read Chapter 12
- o Complete Module 5B Quiz
- o Complete Module 5B Andragogical Exercise

Module 6A Formats, Schedules and Staff Needs (Due November 18, 2012)

- o Read Chapter 13
- o Complete Module 6A Andragogical Exercise
- Complete Module 6A Quiz

Module 6B Preparing Budgets and Marketing Plans (Due November 28, 2012)

- Read Chapter 14 and Chapter 15 in Caffarella
- o Complete Module 6B Discussion Board assignments
- Complete Assignment Exercise 15.1
- Complete Module 6B Quiz
- o Optional: Extra Credit Personal Goals and Learning Assessment Part II

Final Exam

)

Our student learning can be enhanced by familiarizing students with the latest trends, techniques, and technologies in the field. So, this course will be expected to strengthen understanding of the latest developments in electric power engineering areas. An additional benefit of this course is that it will provide critical assessment data so that we can improve our current core classes.

How will the effect of the change be monitored in ongoing program assessment?

Students' review on how the proposed new course is beneficial and useful will be performed at some chapter examinations and the final examination. Also the achievements of similar courses offered by other university will be reported and discussed.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached.

The addition of this course will not affect other departments.

ELEG 3203 Renewable Energy Technology course description

Dr. Bullock,

The following is the course description of the new course:

An introduction and comprehensive overview of renewable energy technology. Topics include distributed generations and renewable energies including wind power, solar power, fuel cells and hydropower. Emphasis will be placed on basic concepts, operation principles and economics of existing and emerging renewable energy technologies.

The hardcopy of the new syllabus is in your mailbox.

Thanks,

Jung-Uk Lim

DEPARTMENT OF ELECTRICAL ENGINEERING ELEG 3203 – Renewable Energy Technology

- 1- Department, number, and title of course: Electrical Engineering, ELEG 3203. Renewable Energy Technology
- 2- Instructor Information: Dr. Jung-Uk Lim Office: Corley 258 Phone: (479) 498-6046 Email: jlim@atu.edu Website: http://faculty.atu.edu/ilim/Teaching.html Office Hours:
- **3-** Course Designation: Elective

4- Course (catalog) Description:

(see attached)

Prerequisites: ELEG 2113 – Electric Circuits 2 Recommend two power engineering courses: ELEG 3153 (Electrical Machines) and ELEG 3163 (Electric Power Systems)

5- Textbook:

ŧ <u>х</u> .

> Gil Masters, Renewable and Efficient Electric Power Systems, 2004, Wiley-IEEE Press. No references are required. Instead, lecture notes will be provided for additional reference.

6- Justification/Rationale for the course:

This course introduces the students to the technological basics on renewable energy and distributed generation. This course also discusses fundamentals of electric power industry and economics of distributed generation and renewable energy. The objective of this course is to provide theoretical foundations on the latest electric energy technology.

7- Course learning outcomes/expected performance criteria:

The successful student will be able to

- 1. Understand the global energy situations and relevant economic and environmental issues.
- 2. Learn about the development of today's electric power industry including the regulatory and historical evolution of the industry.
- 3. Understand how distributed generation systems work and evaluate the economic attributes of the distributed generation technology.
- 4. Understand how three representative renewable energy systems such as wind power systems, solar systems and photovoltaic systems are utilized to generate and to store electrical power.

8- Topics covered:

ι

- 1. Fundamentals of electric power
- 2. General overview of electricity demand and supply, and industry structure
- 3. Distributed generation technologies for increased efficiency
- 4. Economics of distributed resources
- 5. The wind resource and wind generation systems
- 6. The solar resource and solar array systems
- 7. Photovoltaic Systems

9- Class/Laboratory schedule:

3 lecture sessions per week, 50 minutes per session

10-Contribution of course to meeting the requirements of curriculum (Criterion 5): Engineering topics – 3 credit hours.

11-Relationship of Course to Program Outcomes (S-Strong, M-Medium, W-Weak):

a	b	c	d	e	f	g	h	i	j	K
S	S	M		S		W				M
S	– Stror	ng		$\overline{M-M}$	edium		<u> </u>	Weak		

12-Evaluation Methods:

Attendance - 15% Two Mid-term Examinations – 50% Homework - 10% Final Exam - 25%

The final grade will be calculated as follows:

- = (Your Attendance and Participation Score / Total Attendance Score) * 15
- + (Your Total Chapter Exam Score / Total Score of Chapter Exams Score) * 50
- + (Your Homework Score / Total Homework Score) * 10
- + (Your Final Exam Score / Total Final Exam Score) * 25

13-Assessment:

A: 90 - 100% / B: 80 - 89% / C: 70 - 79% / D: 60 - 69% / F: Below 60%

14-Course Policies:

Absence Policy*: Absence for participation in recognized university activities, properly certified personal illness, or recognized emergency may be excused. In order excuse an absence, it should be notified beforehand and/or its evidence should be provided. The following equation will be used to calculate the attendance scores in the final grade:

For total *n* absences over the semester,

(3-*n*) % for $0 \le n \le 14$, (+): rewarded or (-): penalized.

F for $n \ge 15$ due to too many absences.

Academic Dishonesty Policy*: Cheating or plagiarism is not tolerated and repercussions will range from a grade of zero on the assignment to expulsion from the university.

Academic Misconduct Policy*: Disruption of teaching is not tolerated and repercussion will range from a verbal warning to expulsion from the class.

Make-up Tests: Make-up tests will be administered by appointment and only for excused absences. Tests must be taken within 6 weekdays of the original date of the test.

*Please refer to the *Student Handbook* on the university website and the *Faculty Handbook* for definitions and clarification of these policies.

RP 1001 Orientation to Recreation and Park Administration

Dept. of Parks, Recreation and Hospitality Administration Arkansas Tech University

Fall 2013; 1 credit

Instructor: Dr. Glen Bishop Office: 204 Williamson Phone: (479) 964-3228 Fax: (479) 968-0600 email: <u>gbishop@atu.edu</u>

Catalog Course Description:

Orientation to the university and recreation and park administration as a profession. Exploration of successful student and career paths. This course may be taken place of TECH 1001.

ì٨

Purpose:

This course serves as an introduction the university and recreation and park administration for majors and other students who may have an interest in the field.

Goals:

This course examines several questions:

What student behaviors lead to success?

What resources are available on campus to help students be successful?

How do students use Blackboard to achieve academic success?

What career paths are available are typical for students who graduate with a degree in recreation and park administration?

How do these career paths match my interests?

Recreation and Park Administration Program Mission Statement:

The mission of the Recreation and Park Administration Program is to educate Recreation and Park professionals for self, community and society.

Required Texts:

Stevens, C. A., Murphy, J. F., Allen, R. R., & Sheffield, E. A. (2010). A Career with meaning: Recreation, parks, sport management, hospitality, and tourism. Champaign, IL: Sagamore.

Toft, D. & Ellis, D. (2010). *BAMS: The essential guide to becoming a master student.* Belmont, CA: Wadsworth.

Student Evaluation:

Student understanding of the topics which are the focus of the course will be assessed by:

- 1. Course discussions
- 2. Student reports describing university resources
- 3. Quizzes
- 4. Meetings with faculty advisors
- 5. Report on career direction
- 6. Planning semesters for the future.

Course Outline:

Week 1:

Course overview

Week 2:

Strategies for success GPA and College terms

Week 3:

Time and Money Read and noting for understanding and success The art of testing

Week 4: Careers in Recreation and Park Administration Commercial

Week 5: Careers in Recreation and Park Administration Nonprofit

Week 6: Careers in Recreation and Park Administration Government

Week 7: Careers in Recreation and Park Administration Therapeutic Recreation Turf Management Interpretation The RPA Curriculum

Week 8:

Academic Advising

Week 9:

The library is your friend

Week 10:

How to prepare the paper

Week 12

Career services

Week 13:

Health Services

Week 14:

Until we meet again next semester

familiar with key, basic legal issues in each phase of emergency management - preparedness.
mitigation, response and recovery. And at each level of government – local, state, federal, and
international. Interaction between the government, private and volunteer sectors will also be
addressed from a legal perspective. Students will become familiar with the fundamental legal
concepts with which emergency managers need to be equipped.
Grading X Standard Letter DP/F DOther (If other, please specify below)
For the proposed course, attach a syllabus that includes:
a. Course subject, number and title
b. Course description as to appear in catalog
c. Course goals and/or objectives
d. Course outline
e. Methods of student performance assessment and evaluation
f. Course bibliography, reading list, and /or listing of other instructional media
Will this course require any special resources such as unusual maintenance costs, library resources.
special software, distance learning equipment, etc.? Please specify. No
Will this course require a special classroom (computer lab, smart classroom, or laboratory)? Please
specify. No
How does this proposal support the University Mission or University Strategic Planning Goals?
This course proposal supports the Tech mission in that it encourages the scholastic development of
Emergency Management students. The course assignments also address integrity and professionalism
in general and specific to the practice of emergency management. One of the specific course objectives
is to provide a solid educational foundation that encourages life-long learning to students who take the
course. Also, students will learn to communicate more effectively, think critically, and develop ethical
perspectives.
Please provide a rationale for the need for this new course including the evidence derived from your
program assessment. Assessment evidence may come from direct and indirect measures of student
learning as well as analysis of the current state of the discipline.
Legal challenges are faced daily by those in the field of emergency management. Important basic legal
issues that arise in every phase of emergency management at the local, state and national level will be
explored. Upon graduation from the emergency management program, students need to understand
basic legal issues in order to recognize and avoid potential problems, and to identify situations that
require legal counsel.
How will the effect of the change be monitored in ongoing program assessment?
There will be pre-course, post-course tests to assess student learning of important course topics and key
concepts. Also there will be a pre-unit and post-unit test for each section to assess student knowledge of
and objectives and key topics. Also a blackboard survey will be completed by students as another
assessment of student rearring. The survey will help determine it the students mastered the critical
If this course will affect other departments, a Departmental Support Form for each affected
department must be attached N/A

Course Guide

Emergency Management

COURSE NUMBER	EAM 4083 -TC1
COURSE TITLE:	Introduction to Legal Issues in Emergency Management
INSTRUCTOR:	Beth Gray, Associate Professor Dean Hall, 107c 402 West O St. Russellville, AR 72801-2222 (479) 968-0698 Office egray3@atu.edu

COURSE DESCRIPTION:

Prerequisites EAM 1003 and 1013 or consent of professor. This course allows undergraduate students to become familiar with key, basic legal issues in each phase of emergency management – preparedness, mitigation, response and recovery. And at each level of government – local, state, federal, and international. Legal interaction between the government, private and volunteer sectors will also be addressed. Students will become familiar with the fundamental legal concepts with which emergency managers need to be equipped.

REQUIRED READING MATERIAL FOR COURSE

No text required for this course. Reading material and research will be provided by the professor via Blackboard and email.

JUSTIFICATION

Legal challenges are faced daily by those in the field of emergency management. Important basic legal issues that arise in every phase of emergency management at the local, state and national level will be explored. Upon graduation from the emergency management program, students need to understand basic legal issues in order to recognize and avoid potential problems, and to identify situations that require legal counsel.

COURSE OBJECTIVES/LEARNING GOALS

By the end of this course, and a year or more after this course, students will:

- understand the importance of key legal issues in emergency management.
- remember the defining characteristic of key legal issues and laws covered during the course.
- be able to find and utilize legal resources for emergency managers.
- consider legal implications in decision making in all phases of emergency management.
- be able to knowledgeably and objectively discuss laws, legal issues, and their implications with others.
- be able to self-direct their learning determine what else they need and want to learn about legal issues and plan for continued learning.

COURSE POLICIES

J

Course Access

This is an on-line course. Students must have computer access to take this course. Students must factor in technology challenges as part of time management - lack of computer access or computer problems will not excuse students from completing their coursework in a timely manner.

E-Mail Correspondence

In all e-mails to the professor, in the "Subject Line," list the course number and, if applicable, the name or number of the assignment.

Also, be sure that your name is somewhere on the email and on any attached assignment.

Assignment Completion

Exercises and Responses must be received by the due date and time. If you have not made arrangements **prior** to the due date, late assignments will be given a reduction in points. Any assignment that is more than one week late or will not be accepted.

10 mins. – 1 day	10 % reduction
2 days – 4 days	25 % reduction
5 days – 1 week	50 % reduction
> 1 week	0%

Excessive Unexcused Absences/Missed Assignments

If, at any time during the semester, a student fails to complete and turn in assignments and fails to respond to the professor's emails, the student will be referred to the Tech Early Warning Program. If the student is unresponsive to further attempts at contact by the professor, the student will be dropped from the course by the professor with an administrative "F" for excessive absences or non-performance.

Campus Policy

Campus policy outlines the dates for dropping a course with a "W". If you have a failing score and do not drop before the stated deadline, you will receive an "F" on your transcript for the course; therefore, it is in your best interest to monitor your status in the course and take advantage of the opportunity to withdraw with a "W" rather than remaining in the course and receiving an "F". Tech now has a very lenient withdrawal policy which eliminates the deadlines for receiving a "WP" (withdrawn with passing) or "WF" (withdrawn with failing) and has extended the period for withdrawing with just a "W" until almost the end of the semester.

Academic Misconduct

Emergency Managers are entrusted with crucial responsibilities, and must strive to gain and maintain the trust of those they serve. It is important to act and perform in an honest, conscientious, and professional manner in all endeavors.

University policy will be followed. At a minimum, the student (and any student caught assisting in the misconduct) will be given an *automatic* "F" for the test/assignment in question and possibly an "F" for the course. Subsequent cases of plagiarism will result in a minimum of one letter grade course reduction for each incident. In addition, any student who aids another student in plagiarism (e.g., provides a completed homework assignment to another student for submission) will be treated as also being involved in plagiarism and appropriate penalties will apply. Egregious cases of plagiarism (i.e., large sections copied from another source) will result in an automatic "F" for the course. You must cite your sources (for this course, a simple URL will usually suffice unless otherwise specified).

COURSE ASSESSMENT

Assignments		Points
Assignmer	nts 1 thru 10 (50	
pts. each)		500
Mid-term		250
Final		250
Total		1,000
Percent	Grade	
90 - 100	A	7
80 - 89	В	
70 - 79	C	7
60 - 69	D	7
0 - 59	F	7

Effort and Substance

The effort put forth by the student and the substance of the student's answers will be considered in all work submitted for the course.

If you find that a question cannot be answered straight from the assigned reading material, the intent is for you to take what you have learned from the reading and extrapolate from it. The question may be answered based on a concept from the reading rather than a verbatim example, or it may require some outside research.

The purpose is for the student to develop thinking skills – intellectual activity versus memorization or searching cutting and pasting. Throughout the course the student will be asked to use critical, practical, and creative thinking, which will be significantly more beneficial than memorizing or copying material and forgetting it shortly thereafter.

Grammar, Punctuation, and Spelling

Effective communication is a critical part of emergency management. In order to convey important ideas and information effectively in writing, it is important to use complete sentences, proper grammar correct spelling and punctuation. Proper written communication will be considered in addition to the substantive content of all assignments.

COURSE CONTENT

Assignments

The Assignment Schedule is shown in Attachment A.

The assignments will be posted on Blackboard under the Assignments tab or submitted to the student via email.

Assignment completion will consist of the following steps:

- Complete the reading assignment(s).
- Answer the assignment questions.
- Complete a thorough, concise summary of the reading assignment(s).
- Give a description of what you consider to be the most important concept from the reading(s).
- Respond *substantively* to *at least* one other student's posting. (The student response to another student's posting will consist of appropriate comments, thoughts or related ideas branching from that posting.)
 - It is important to note that students, who otherwise do well in the course, sometimes forget this critical part of the assignment. Because we do not meet in a traditional classroom setting, Discussion Board provides the vehicle to facilitate the interaction necessary to fully benefit from a course of this nature. Note that responses are worth more than a quarter of each assignment's points.

The sample format for the assignment postings is shown in Attachment B. The sample can be used as a template and then copied and pasted into the Blackboard Discussion Board area. Steps to make an assignment posting are:

- Click on Discussion Board in the Control Panel
- Click on the assignment/unit number. For example: Assignment #1
- Click on Add New Thread
- Type or copy and paste your assignment into the Message box. PLEASE DO NOT JUST ATTACH YOUR ASSIGNMENT AS A DOCUMENT, because that adds an unnecessary step for classmates and the professor in reviewing the posting.

The grading rubric for the assignments is listed below:

Assignment Grading Rubric		
Answers (effort, substance,	15 points	
grammar, spelling and		
punctuation)		
Summary (effort, substance,	10 points	
grammar, spelling and	_	
punctuation)		

Interaction with Other	15 points
Student(s)/Participation(effort,	
substance, grammar, spelling	
and punctuation)	
Overall Quality (effort,	10 points
substance, grammar, spelling	
and punctuation)	

<u>Midterm</u>

The Midterm will be comprehensive and may consist of a project, critical analysis, short answer, essay, technical writing, multiple choice, matching, true/false. Instructions will be provided at the time the Midterm is assigned.

Final Project

The Final will be comprehensive and may consist of a project, critical analysis, short answer, essay, technical writing, multiple choice, matching, true/false. Instructions will be provided at the time the Midterm is assigned.

Self-Assessment

The student may be asked to complete a self-assessment rubric, which will be provided by the professor toward the end of the course. The student will add at least one criterion to the rubric, provide any additional comments, and submit the rubric to the professor.

BLACKBOARD HELP

For help using Blackboard go to <u>http://etech.atu.edu/</u> and click on "Help Desk" then "FAQs – Students" or go to <u>http://elearn.atu.edu/_</u> for further information call 479-964-0646 or toll free at 866-400-8022.

(I.e., Clip	pers, clipper blades, scotch combs, and adhesive sprays).
specify	course require a special classroom (computer lab, smart classroom, or laboratory)? Please
specity.	
Classroo	m resources needed for this course are currently available on the ATU Farm (i.e., livestock
handling	g facilities and classroom).
How doe	s this proposal support the University Mission or University Strategic Planning Goals?
In keepir	ng with the University Mission, a course in livestock selection and evaluation (AGAS 3032) is
expected	to further support the "nurturing [of] scholastic development, integrity and professionalism" of
students	majoring in Agricultural Education (please see rationale in the next section). Additionally, AGAS
3022 wo	uld enhance the department's delivery of "first quality education services" (Strategic Planning
Goal #1)	by aligning the Agricultural Education program of study with expected career needs. Thus,
student s	success (Goal #2) in their future profession should be improved through better preparation as
universit	y partnerships with private sectors are strengthened (Goal #4) through student exposure on field
trips, wh	ich should serve to effectively market the university (Goal #5) in new ways.
Please pr	rovide a rationale for the need for this new course including the evidence derived from your
program	assessment. Assessment evidence may come from direct and indirect measures of student

learning as well as analysis of the current state of the discipline.

A need exists to expand the breadth of content for development of Arkansas agriculture educators. Program changes have been proposed to eliminate a course in entomology due to an absence of secondary agriculture courses or FFA contests in Arkansas that involve entomology. However, content in livestock evaluation would benefit preservice development for teaching in agriculture classes (i.e., Survey of Ag Systems, Animal Science, and Biological Animal Science) and supervising agricultural experiences (e.g., livestock entrepreneurship projects). Likewise, other reputable institutions (e.g., University of Missouri, University of Arkansas, and Oklahoma State University) have previously justified similar course offerings. How will the effect of the change be monitored in ongoing program assessment?

This course will be included in the Department of Agriculture program review every 5 years. Course assessment is analyzed through student enrollment, performance, and evaluation. Instruction of the course will be supported through the peer evaluation process currently in use at Arkansas Tech University. Finally, as a required course for students majoring in Agricultural Education, the course will also be reviewed in the overall Teacher Certification Report during the accreditation review process. If this course will affect other departments, a Departmental Support Form for each affected

department must be attached.

No affect is expected for other departments.

Justin Killingsworth, Assistant Professor 123E Dean Hall E-mail: justinkillingsworth@atu.edu Office Phone: (479) 880-4230 Dept. Phone: (479) 968-0251 Office Hours: TBD

Times and Locations

Thursday 1:00pm-3:00pm (ATU School Farm)

Course Description

This course is offered as a study in livestock selection according to desirable characteristics for cattle, swine, sheep, goats, horses, and poultry. Evaluation criteria are presented according to industry standards for species' breeds and expected market production. Students will be expected to develop safe handling practices with live animals.

Required Textbooks-

 Herren, Ray V. (2010). <u>The art and science of livestock evaluation</u> (1st ed.). Cengage Learning. ISBN-10: 1428335927 ISBN-13: 9781428335929

Course Objectives

Through experiential learning experiences, projects, assignments and examinations, students will demonstrate the following:

- Review livestock characteristics as desired in meat, dairy, and poultry markets.
- Detail ideal characteristics and seedstock with superior genetics from major breeds in cattle, swine, sheep, goats, and poultry.
- Develop skill in evaluating livestock according to market and breed characteristics.
- Justify selection criteria through verbal presentation of reasons.
- Review nutritional requirements for cattle, swine, sheep, goats, and poultry.
- Discuss ethical considerations in feeding and caring for livestock.
- Select and feed appropriate rations for livestock.
- Develop skill in handling livestock prior to and during exhibition (e.g., halter-breaking, leading, and showmanship for a steer).
- Identify market trends in meat, dairy, and poultry markets.

Course Outline

Week	Content
1	 Introduction to the Course Orientation to the ATU School Farm Assignment of Project Animal
2	 Review of Feeds & Feeding Content Ration Formulation Lab
3	Ethics in Feeding Show ProjectsShow Animal Nutrition Exam
4	 Breed Characteristics for Beef Cattle Beef Exhibition Practices
5	 Breed Characteristics for Sheep Field Trip to Pope Co. Fair
6	 Breed Characteristics for Meat Goats Sheep & Goat Exhibition Practices
7	 Breed Characteristics for Swine Swine Exhibition Practices
8	Breed Characteristics for Chickens and Turkeys
9	 Breed Characteristics for Dairy Cattle Dairy Cattle & Goat Exhibition Practices

F = 59.4% or below	

Professionalism

Agricultural educators are professionals guided by specific values and engaging in particular behaviors. These values and behaviors include respect, cooperation, active participation, intellectual inquiry, punctuality, and regular attendance. In addition to what you know and can do, you will be evaluated on your growth as a professional. Professional characteristics on which you will be judged include punctuality, attendance, collegial attitude, and participation. Because this course relies extensively on discussion and other class interactions, attendance is crucial to your success and that of your classmates. If you are ill or an emergency occurs, contact your instructor **prior** to the scheduled class time; otherwise, your attendance and participation are firm expectations.

Toward this effort, the following professional expectations exist:

- Come to class every day. Absences must be eliminated due to the short duration of the course. <u>Unexcused absences will lower your grade</u>. Pre-arranged absences will only be excused if the instructor deems the reason to be valid. Absences due to illness or injury will be excused by a doctor's note. Please see the attendance policy listed below.
- Arrive to class on time. As prospective professionals you are expected to be punctual. <u>Unexcused tardies will lower your grade.</u> Please see the tardy policy listed below.
- 3. Actively participate in the class and laboratory activities.
- 4. Tobacco products are not allowed at any time in the classroom or laboratory.
- 5. Appropriate dress is required while in the laboratory. Appropriate dress is interpreted as closed toed, closed shoes or boots. A 100% long pants or lab coat. Additionally long hair should be held back by a cap or some other means.

- 6. Positive leadership and interpersonal relationships are encouraged. Disrespect toward your instructors, fellow students, or resource people will not be tolerated.
- 7. At times, the instructors must evaluate professionalism subjectively.

Class Absences

• Students who miss two classes are sent a warning letter and are dropped from the class upon the third absence. For emergency absences please refer to the Arkansas Tech University Webpage under the *Student Services* link (www.atu.edu).

Plagiarism and Other Academic Misconduct

- Any student found to have committed academic misconduct including, but not limited to cheating, plagiarism, or other forms of academic dishonesty is subject to the disciplinary sanction outlined in the current *Arkansas Tech Undergraduate Catalog*.
- Plagiarism is defined as "to take and use ideas, passages, etc. from another's work representing them as one's own". (*Random House Webster's Dictionary*).

Disability Information

Information concerning accommodation may be obtained from Disability Services located in Bryan Hall Suite #103 on the ATU campus. The website address to learn more about these services is <u>http://www.atu.edu/testing/</u>. IT IS THE STUDENT'S RESPONSIBILITY TO REGISTER WITH AND NOTIFY DISABILTY SERVICES FOR ACCOMODATION PURPOSES. No accommodation will be made in lieu of individual disabilities without communication from Disability Services to the Professor.

ALL STUDENTS ARE EXPECTED TO COMPLY WITH THE ATU CODE OF CONDUCT. (DETAILED IN STUDENT HANDBOOK)

NU	University Strategic Denning Coole?	
The Agriculture Business Pre Veteringer Option provide	University strategic Planning Goals?	
The Agriculture Business Pre-Veterinary Option provides an educational opportunity to students in our		
geographical region preparing them to apply to regional Colleges of Veterinary Medicine. It also		
combination supports and serves two vital areas of nor	ad in our geographical area and will foster	
education and encourage life-long learning. Additional	w the program supports the Universities	
Strategic Plan by offering a new program that is consid	ered necessary by the Agriculture Industries in	
our region.		
Please provide a rationale for the need for this new cours	e including the evidence derived from your	
program assessment. Assessment evidence may come	from direct and indirect measures of student	
learning as well as analysis of the current state of the d	iscipline. This course will be required for both	
the Pre-veterinary and Animal Science Options. Current	ly the Pre -vet students are taking Genetics BIOL	

3034 which covers some of the same topics needed however it does not cover animal breeding which is an

important concept required for vet school and needed by the animal science students.

How will the effect of the change be monitored in ongoing program assessment? There will be no change in the ongoing program assessment.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached.
Animal Breeding and Genetics AGAS 3993

Instructor: Dr. Alvin Williams

Email: awilliams37@atu.edu Phone: (479) 356-6251 Office: 124 D Dean Hall

Lectures: TBD

Office Hours: TBD

Course Description: Basic principles of Mendelian and quantitative genetics as they apply to the improvement of farm animals. Selection, inbreeding, crossbreeding and their application to the improvement of beef cattle, dairy cattle, swine, horses and poultry as well as the genetic control of coloration and defects in cattle and horses are included. Prerequisite: AGAS 1014, BIOL, 1014 or higher, or consent of the instructor.

Course Objective:

1. Understand the principles of Mendelian genetics, segregation, recombination and mutation as they apply to the inheritance of qualitative characters (coat colors and spotting patterns) and genetic defects in farm animals.

2. Understand the traits of importance to the livestock industry, and the concepts of the inheritance of these traits such as heritability, repeatability, estimation of breeding values (EPDs, PTAs), accuracy (reliability) of breeding values, response to selection, correlated response to selection.

3. Be able to understand the effects of inbreeding and crossbreeding on populations, to be able to calculate inbreeding coefficients from pedigrees, to evaluate expected heterosis from crossbreeding systems and to design effective crossbreeding systems.

4. Be able to evaluate genetic information from performance testing programs and beef and dairy cattle sire summaries and to explain the current genetic evaluation procedures used in the swine, poultry and equine industries.

Course Textbook: Animal Genetics - The Science of Animal Breeding (F.A.Crew)

Course Material: (order of material along with additional material subject to change by instructor)

- 1. Genetics nomenclature.
- 2. Physical Structure of the Gene
- 3. Mendelian Genetics
- 4. Mutations and suppressors
- 5. Statistical or Quantitative genetics
- 6. Equine Coat Color Genetics
- 7. Genetic Disorders in Cattle
- 8. Dairy Cattle Genetics
- 9. Poultry Genetics
- 10. Swine Genetics
- 11. Crossbreeding and inbreeding
- 12. Population Genetics
- 13. Transgenic Animals
- 14. Selection and its effect on Animal Performance
- 15. Cloning

Grading System:

90-100 A 80-89 B 70-79 C 60-69 D □60 F

You will earn your grade according to the following course requirements:

Item	Points
Final Exam	100
Up to 20 Assignments or Activities (10-50 each)	0-200
2 to 4 Mid-Term Exams (100 each)	200-400
· · · ·	400-800

The course requirements listed above are tentative and may be changed by the instructor at any time. Minimum requirements for some or all of the grades may be lowered at the discretion of the instructor.

Exams: Two to four mid-term exams will be given along with a final. Once you leave the classroom you are finished with the exam and cannot return without the instructor's permission. Once any person has finished a test or left the room no other tests will be handed out. No exemptions will be made for the final exam. You are allowed to answer your exam in anything other than purple or red ink. A non-programmable calculator is acceptable for the exam if calculations need to be performed. Calculators used for exams must be a standalone device, that is to say, calculators on cell phones, PDAs, or other electronic devices are NOT permitted during the test. Any programmable calculators, cell phones, PDA's or other forbidden electronic devices <u>USED OR SEEN</u> during an exam will qualify as cheating and will be treated in the manner listed in the academic misconduct/dishonesty section of the syllabus. DO NOT TAKE OUT YOUR CELL PHONE TO CHECK THE TIME OR TO TURN OFF THE RINGING, AS ANY VISUAL SIGNS WILL VOID YOUR TEST SCORE. No other notes, material or technology may be used during exams unless specifically authorized by the instructor. All exams should be considered comprehensive of all material covered prior to the exam.

Only excused absences are acceptable for missing a midterm exam:

- University activity with letter
- incapacitating illness with doctor's letter
- funeral with funeral program

Excused absences must arrange an alternative test time before the test, if possible, or at least notify instructor before the test. Only in the most extreme emergency situation would you not be able to call me or send an email by test time to say that you will be unable to take the test as scheduled. If that should happen you will be instructed to contact the instructor as soon as possible after the test to schedule your makeup exam. A midterm exam missed because of an excused absence must be made up within 72 business hours after the scheduled exam otherwise the missed exam will be considered unexcused and a grade of zero will be assigned. Instructor reserves the right to give a different test for makeup.

<u>Class Participation and Behavior</u>: You are encouraged to actively participate by asking questions and offering comments during class. In most cases your questions and comments will be helpful to the entire class. You are asked to abide by the following rules to maintain a good learning environment for everyone.

1) No disruptive behavior and no talking when the instructor or other students are conducting class.

- 2) Turn off cell phones and other devices that make noise in class.
- 3) Pay attention to all announcements made in class.
- 4) Do not leave class or begin gathering your belongings until class is dismissed.

If for any reason you are asked to leave class, you are not allowed to return that day and an absence will be recorded. If you are asked to leave again, the teacher reserves the right to refuse entry back into the classroom. If you are refused entry, you will be dropped from the class and will not be allowed into the class until the next semester offered.

Bonus Points: The instructor may, at his discretion, offer opportunities for bonus points. These may occur in the form of unannounced activities in class or optional exercises. Should they occur these points will be added to the students earned point total but will not be added to the required point total for the course. If you are not present during the bonus point activity, the activity **cannot** be made up.

<u>Assignments or Activities</u>: All assignments are due during class on the day indicated in class. Late assignments **may or may not** be accepted at the instructor's discretion at the beginning of the next class but with a cost of 10% of the points. No points will be given after the beginning of the next class period. Activities that are done during class cannot be made up.

<u>Class Attendance</u>: Attendance will be taken on a daily basis. You are responsible for material and announcements made in class. Thus the following allowances and consequences will be put in place. Tardiness will be recorded for anybody showing up after attendance is taken. Three tardies will count as one absence. The enforcement of attendance is at the discretion of the instructor.

Numbers or missed days	Consequence
0-4 days	No effect
5-8	Lose one letter off final grade
8-12	Lose two letters off final grade
More than 12	F is given for the final grade

<u>Academic Misconduct/Dishonesty</u>: Academic misconduct and academic dishonesty will not be tolerated in this course. University policy will be followed for any such incident. Academic dishonesty in this course is defined as cheating and/or assisting with cheating on an exam or homework, plagiarism, unauthorized possession of examinations, falsification of records, reading or attempting to read another student's answer, communicating with another person while a quiz or exam is in progress, and the use of books, notes, or any other materials not authorized during a quiz or exam. Academic misconduct or dishonesty will result in a grade of zero for the quiz,

Computers in Agriculture AGBU 4153 Fall 2012

Instructor: Dr. Molly Brant Email: <u>mbrant@atu.edu</u> Phone: (479) 968-0634 Office: 123A Dean Hall

Lectures: online

Office Hours: Monday and Wednesday: 11 am - noon and 1 pm - 3 pm Thursday: 9:30 am - 12:30 pm ** Friday: 11 am - noon ** On 9-11-12, 10-9-12, 11-13-12, and 12-4-12, I will be coming in on Tuesday from 10 am - noon and 1 pm - 2 pm instead of Thursday's scheduled office hour time.

The door is always open so please feel free to stop by if you need assistance or would like to chat. If you would like to guarantee a block of time, please send an email or call to set up an appointment.

or consent

<u>Catalog Description of Course</u>: Prerequisite: AGBU 2063, 2073, and COMS 1003. An application of the Microsoft Office programs in agriculture. Using Excel to forecast prices, make charts, and see trends in quantities and prices.

Course Objectives: This course is designed to

- Expose the students to business applications of computer programs, specifically Excel.
- Assist students in understanding the changes and underlying causes to agricultural prices and movements.
- Specifically understand price indexing and it application to agricultural prices.
- Understand charts and graphs that visually explain price movements.

Course Textbook: None required. We will rely solely on notes and computer problems.

Grading System:

90-100 A 80-89 B 70-79 C 60-69 D <60 F

Grades are not given in the class. You will earn your grade according to the following course requirements:

Item	<u>Points</u>
Final Exam	150
2 In-class tests (100 each)	200
22 assignments or Activities (50 each)	1100
-	1450

Exams: Two exams will be given and must be submitted on Blackboard. Calculators on cell phones, PDAs, or other electronic devices are **NOT** permitted during the test. Any programmable calculators, cell phones, PDA's, or other forbidden electronic devices **USED OR SEEN** during an exam will qualify as cheating and will be treated in the manner listed in the academic misconduct/dishonesty section of the syllabus. Do not take out your cell phone to check the time or to turn off the ringing as any visual signs will void your test score. No other notes, material or technology may be used during exams unless specifically authorized by the instructor. All exams should be considered comprehensive of all material covered prior to the exam. On examination days, you can receive a test until 10 minutes after class starts or until the first person turns in their test, whichever event happens first. If you are going to be later than 10 minutes, you need to let the instructor know before the exam starts. Please contact me immediately if you have issues with the test.

Only excused absences are acceptable for missing a midterm exam:

- university activity with letter
- incapacitating illness with doctor's letter
- funeral with funeral program

Excused absences must arrange an alternative test time before the test, if possible, or at least notify instructor before the test. Only in the most extreme emergency situation would you not be able to call me or send an email by test time to say that you will be unable to take the test as scheduled. If that should happen you will be instructed to contact the instructor as soon as possible after the test to schedule your makeup exam. A midterm exam missed because of an excused absence must be made up within 72 business hours after the scheduled exam otherwise the missed exam will be considered unexcused and a grade of zero will be assigned. Instructor reserves the right to give a different test for makeup.

<u>Class Participation and Behavior</u>: You are encouraged to actively participate by asking questions and offering comments during class. In most cases your questions and comments will be helpful to the entire class. You are asked abide by the following rules to maintain a good learning environment for everyone:

- 1) No disruptive behavior and no talking when the instructor or other students are conducting class.
- 2) Turn off cell phones and other devices that may make noise during class.
- 3) Pay attention to all announcements made in class.
- 4) Do not leave class or begin gathering your belongings until class is dismissed.

If for any reason you are asked to leave the class, you are not allowed to return that day and an absence will be recorded. If you are asked to leave again, the teacher reserves the right to refuse entry back into the classroom. If you are refused entry, you will be dropped from the class and will not be allowed into the class until the next semester offered.

<u>Blackboard:</u> Your grades, announcements, and discussions will be posted on Blackboard. You will be blocked from further discussion and sent to the appropriate campus group if you resort to name calling, bashing, or any other form of misconduct. All assignments and tests will be submitted on Blackboard.

<u>Assignments or Activities</u>: All assignments are to be submitted on Blackboard. All instructions/write-ups will be given on Blackboard. Please do not wait until the last moment to submit your assignment as others may choose to do the same or Blackboard may be down. I will be unable to handle the amount of emails/submissions on my ATU email account and thus will not grade items submitted that way. We will cover submission information and Blackboard set-up on the first day of class information.

<u>Grades:</u> Grades will be kept current on Blackboard. Please refer there for your information. Send me an email if you have questions about your scoring.

<u>Class Attendance</u>: Attendance will be taken on a daily basis. You are responsible for all material covered and announcements made in class. Thus the following allowances and consequences will be put in place.

Number of missed days	Consequence
0-4	No effect
5-8	Lose one letter off final grade
More than 9	Lose two letters off final grade

<u>Academic Misconduct/Dishonesty</u>: Academic misconduct and academic dishonesty will not be tolerated in this course. University policy will be followed for any such incident. Academic dishonesty in this course is defined as cheating and/or assisting with cheating on an exam or homework; plagiarism; unauthorized possession of examinations; falsification of records; reading or attempting to read another student's answer, or communicating with another person while a quiz or exam is in progress; and the use of books, notes, or any other materials not authorized during an exam or quiz. In addition, talking to another student during a quiz or exam will be viewed as dishonesty. Academic misconduct or dishonesty will result in assignment of a grade of zero for the quiz, exam, homework, or paper involved; or such other disciplinary actions as are appropriate under university policy. Unless otherwise clearly stated in the assignment, all assignments are to be done by the individual student and not by a "group effort." *If you have questions about this, please ask the instructor.*

<u>Academic Accommodations</u>: If any member of the class feels that he/she has a disability and needs special accommodations of any nature whatsoever, the instructor will work with you and Disability Services to provide reasonable accommodations to ensure that you have a fair opportunity to perform in this class. Please advise the instructor of such disability and the desired accommodations at some point before, during or immediately after the first scheduled class period.

Attachments:	image001.jpg

It should be AGBU 1013, 2063, 2073 and COMS 1003

Sorry do I need to do something else

From: Tammy Rhodes Sent: Thursday, October 11, 2012 12:20 PM To: Malcolm Rainey Jr Cc: Susan Morris Subject: AGBU 4153

Dr. Rainey:

In the course addition form for AGBU 4153, Computers in Agriculture, the prerequisite in the proposal and in the course syllabi differ. Molly's syllabi has AGBU 2063, 2073, and COMS 1003. The proposal has AGBU 1013, 2063, and 2073.

Which should I correct? Thanks.

Tammy

NOTES: These changes will become effective in the	Summer Term of the new catalog year.
If this course is cross-listed, a prerequisite,	co-requisite, or included in the course description
of other courses, a Course Change must be	e submitted to address all changes in related
courses.	

New Course Number : 2084

New Course Title (Limited to 30 characters including spaces):

New Course Description: Principles of animal nutrition, characteristics of feed ingredients, feeding strategies and formulation of rations for farm animals. Lecture 3 hours, laboratory two hours.

New Cross-list:

Adding Cross-listing	□ Changing Cross-listing	Deleting Cross-listing
If adding or changing cro	ss-listing, indicate course s	ubject and number

New Prerequisite (list all, as you want them to appear in the catalog):

New Co-requisite (list all, as you want them to appear in the catalog):

Elective Major Minor

If major or minor course, you must complete the Request for Program Change form.

Please provide a rationale for the change including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline. This course is required for both the Preveterinary and Animal Science Options. The addition of a lab will allow for a more in-depth look at feed ingredients and identification, feed and forage analysis, and use of ration balancing software.

How will the effect of the change be monitored in ongoing program assessment?

There will be no change in program assessment.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

No other department is affected.

FEED AND FEEDING AGAS 2084 Spring 2013

Instructor: Dr. Alvin Williams Email: <u>awilliams37@atu.edu</u> Phone: (479) 968-0634 Office: 123D Dean Hall

Lectures: Time and Place- TBA

Lab: Time and Place TBA

Office Hours: TBA

Catalog Description of Course: Prerequisites: AGAS 1014, CHEM 1114, or consent of instructor. Principles of animal nutrition, characteristics of feed ingredients, feeding strategies, and formulation of rations for farm animals. Lecture three hours. 4.000 Credit hours 3.000 Lecture hours 1.000 Lab hours

Course Textbook: Livestock Feeds and Feeding 6th Edition (Kellums and Church)

Course Material (order and testing along with additional material subject to change by instructor)

Digestion Rumen Fermentation Test1 Nutrient Digestion and Metabolism Energy Measurement and Utilization Test 2 High Energy Feedstuffs Protein Feedstuffs Test 3 Roughages Ration Formulation Final Test

Grading System:

90-100 A 80-89 B 70-79 C 60-69 D □60 F

You will earn your grade according to the following course requirements:

Item	<u>Points</u>
Final Exam	100
Up to 10 Assignments or Activities (10-50 each)	0-200
2 to 8 Mid-Term Exams (50-100 each)	200-400
	400-750

The course requirements listed above are tentative and may be changed by the instructor at any time. Minimum requirements for some or all of the grades may be lowered at the discretion of the instructor.

<u>Labs</u>: Labs will be held on Tuesday from 1:00 to 2:50 PM. Labs may be held at various sites it is the responsibility on the student to determine where the labs will be and make arrangement to be there. Participation points may be given for attendance and participation in labs. If you miss a lab for any reason that lab cannot be made up and any points awarded for that lab will be lost. Be aware that clothing suitable for inclement weather conditions will be necessary in certain labs, so dress accordingly. Improper dress is not an excuse for non-participation.

Exams: Two to four mid-term exams will be given along with a final. Once you leave the classroom you are finished with the exam and cannot return without the instructor's permission. Once any person has finished a test or left the room no other tests will be handed out. No exemptions will be made for the final exam. You are allowed to answer your exam in anything other than purple or red ink. Please write both large and legible, answers that I can not easily read will be counted wrong. A non-programmable calculator is acceptable for the exam if calculations need to be performed. Calculators used for exams must be a stand alone device, that is to say, calculators on cell phones, PDAs, or other electronic devices are NOT permitted during the test. Any programmable calculators, cell phones, PDA's or other forbidden electronic devices **USED OR SEEN** during an exam will qualify as cheating and will be treated in the manner listed in the academic misconduct/dishonesty section of the syllabus. DO NOT TAKE OUT YOUR CELL PHONE TO CHECK THE TIME OR TO TURN OFF THE RINGING, AS ANY VISUAL SIGNS WILL VOID YOUR TEST SCORE. No other notes, material or technology may be used during exams unless specifically authorized by the instructor. All exams should be considered comprehensive of all material covered prior to the exam.

Only excused absences are acceptable for missing a midterm exam:

- university activity with letter
- incapacitating illness with doctor's letter
- funeral with funeral program

Excused absences must arrange an alternative test time before the test, if possible, or at least notify instructor before the test. Only in the most extreme emergency situation would you not be able to call me or send an email by test time to say that you will be unable to take the test as scheduled. If that should happen you will be instructed to contact the instructor as soon as possible after the test to schedule your makeup exam. A midterm exam missed because of an excused absence must be made up within 72 business hours after the scheduled exam otherwise the missed exam will be considered unexcused and a grade of zero will be assigned. Instructor reserves the right to give a different test for makeup.

<u>Class Participation and Behavior</u>: You are encouraged to actively participate by asking questions and offering comments during class. In most cases your questions and comments will be helpful to the entire class. You are asked to abide by the following rules to maintain a good learning environment for everyone. Extra credit maybe given at anytime for class participation.

1) No disruptive behavior and no talking when the instructor or other students are conducting class.

- 2) Turn off cell phones and other devices that make noise in class.
- 3) Pay attention to all announcements made in class.
- 4) Do not leave class or begin gathering your belongings until class is dismissed.

If for any reason you are asked to leave class, you are not allowed to return that day and an absence will be recorded. If you are asked to leave again, the teacher reserves the right to refuse entry back into the classroom. If you are refused entry, you will be dropped from the class and will not be allowed into the class until the next semester offered.

<u>Bonus Points:</u> The instructor may, at his discretion, offer opportunities for bonus points. These may occur in the form of unannounced activities in class or optional exercises. Should they occur these points will be added to the students earned point total but will not be added to the required point total for the course. If you are not present during the bonus point activity, the activity **can not** be made up.

<u>Assignments or Activities</u>: All assignments are due during class on the day indicated in class. Late assignments **may or may not** be accepted at the instructor's discretion at beginning of the next class but with a cost of 10% of the points. No points will be given after the beginning of the next class period. Activities that are done during class can not be made up.

<u>Class Attendance</u>: Attendance will be taken on a daily basis. You are responsible for material and announcements made in class. Thus the following allowances and consequences will be put in place. Tardiness will be recorded for anybody showing up after attendance is taken. Three tardies will count as one absence. The enforcement of attendance is at the discretion of the instructor.

Numbers or missed days	Consequence
0-4 days	No effect
5-8	Loss of one letter off final grade
8-12	Loss of two letters off final grade
More than 12	F is given for the final grade

<u>Academic Misconduct/Dishonesty</u>: Academic misconduct and academic dishonesty will not be tolerated in this course. University policy will be followed for any such incident. Academic dishonesty in this course is defined as cheating and/or assisting with cheating on an exam or homework, plagiarism, unauthorized possession of examinations, falsification of records, reading or attempting to read another student's answer, communicating with another person while a quiz or exam is in progress, and the use of books, notes, or any other materials not authorized during a quiz or exam. Academic misconduct or dishonesty will result in a grade of zero for the quiz, exam, homework, or paper involved; or such other disciplinary actions as are appropriate under university policy.

<u>Academic Accommodations</u>: If any member of the class feels that he/she has a disability and needs special accommodations of any nature whatsoever, the instructor will work with you and Disability Services to provide reasonable accommodations to ensure that you have a fair opportunity to perform in this class. Please advise the instructor of such disability and the desired accommodations at some point before, during or immediately after the first scheduled class period.

If this course is cross-listed, a prerequis	ite/co-requisite, or included in the course description
of other courses, a Course Change must	t be submitted to address all changes in related
courses.	

New Course Number : 3023

New Course Title (Limited to 30 characters including spaces):

New Course Description: Selection, culture, production, distribution and uses of pasture and forage plants; management problems in hay and silage; emphasis on utilization and improvement of pasture. Lecture 3 hours

New Cross-list:

□ Adding Cross-listing □ Changing Cross-listing □ Deleting Cross-listing If adding or changing cross-listing, indicate course subject and number _____

New Prerequisite (list all, as you want them to appear in the catalog): No change

New Co-requisite (list all, as you want them to appear in the catalog):

Elective

Minor

□Maior

If major or minor course, you must complete the Request for Program Change form.

Please provide a rationale for the change including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline. This course is required by the Animal Science Option students. The request to remove the lab because all of the material can be covered in a lecture setting. The lack of support for appropriate equipment is also a reason for this request as well as trying to remain within the 120 hours.

How will the effect of the change be monitored in ongoing program assessment?

There will be no change in the assessment of the program.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

No other department is affected by the requested changes.

Currently the Agriculture Business Degree option h complete the degree.	has 22 hours of upper level electives required to
The objective of the change is to increase the num base of our Ag Business graduates.	ber of required courses and expand the knowledge
Required course additions include: AGBU 3133 Inte Appraisal of Farm Real Estate, AGBU 4053 Agricult	ermediate Agricultural Macroeconomics, AGBU 4043 Tro Price Analysis, AGBU 4063 Agriculture
Investments. These courses are already being taug	ht as elective classes. Additionally we will require a
new course developed by EAM and taught this fall.	called Logistics-EAM 4993. A new Ag Business course
has been developed called Commodity Risk and Fu	tures AGBU 4073 that will also be required. That is
BS degree in Agriculture Business with Business On	tion
by degree in Agriculture busiless with busiless Op	
What impact will the change have on staffing, on o	ther programs and space allocation?
There will be no additional staffing or space allocat	ions required for these changes.

Please provide a rationale for the need for this new course including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

At this time Ag Business majors have the opportunity to take 22 hours of non- directed upper level Ag electives and based on our reviews of other Ag Business programs in the state (U of A, ASU, and SAU) none permitted as much variation in their curriculum as we currently allow. Based on this information we are requesting these program changes to improve the competiveness of our students by providing increased direction in their degree option and also assist students if transferring or heading to graduate school.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

Find attached the Departmental support Form for EAM.

Program Title: Effective Date: Fall 2013 Agriculture Business Animal Science Option (b) Outline change in program and attach curriculum matrix: The request is to add a lab to AGAS 2083 which is to become AGAS 2084 Feeds and Feeding also Remove the lab from AGPS 3024 Forage Crops and Pasture Management it would become AGPS 3023 What impact will the change have on staffing, on other programs and space allocation? There will be no impact on staffing or other program and space allocations. Please provide a rationale for the need for this new course including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline. This both courses are currently required for the Animal Science Options and the Feeds and Feeding is required for the pre-vet option as well. The addition of a lab for Feeds and Feeding will allow for a more in-depth look at feed ingredients and identification, feed and forage analysis, and use of ration balancing software. The removal of the lab for AGPS 3024 helps to maintain our hours to 120 and labs for that class were hard to fill and lacked support to provide equipment to keep it current. If this course will affect other departments a Departmental Support Form for each affected department must be attached. No other departments will be affected by these changes.

Program Summary: (Include general descripti additions or modifications, proposed cost, fac equipment, purpose, and any other important	on of program with overview of any curriculum ulty resources, library resources, facilities and information)

Business Feed Mill Management Option based on recommendations from Tyson, OK Foods and Cargill as well as the Agriculture Departments Advisory Board. According to these industries there is a need for individuals that have the knowledge and desire to feed animals, manage people, facilities and logistics.

The baccalaureate degree program in agri-business integrates the discipline of agriculture, business, accounting, economics, and finance. Emphasis is placed on management directed toward the farm business and agri-business firms. The Feed Mill Management Option focuses on the feeding, nutrition, logistics, risk management involved in commercial feed mill management. All sectors of Animal Agricultural are business entities and each sector feeds animals for different purposes. Therefore this program is designed to give students a broad overview of Agriculture a deep understanding of the business aspect and a comprehension of how to feed, manage and implement a risk management program for purchasing commodities and managing a feed mill.

The only additional course to be developed and offered would be the AGBU 4073 Commodity Risk and Futures. The remaining courses required for this option are currently offered within the Animal Science Option and the Department of Emergency Management. The addition of this option will not have an additional cost associated with it. No new faculty, resources, facilities or equipment will be required to implement this new option.

List existing degree programs that support the proposed program:

Agriculture Business Degree, Animal Science Option and Emergency Management

Need for the Program: (Survey data on student interest in the program (numbers not percentages), job availability, corporate demands, and employment/wage projections). Focus mostly on state needs. As an attachment, include letters of support from organizations and businesses that can speak to number of job vacancies, whether the degree will provide opportunities for job advancement, increase in wages based on additional education, etc.)

Currently in the south east there is only one such program offered and it is located in North Carolina. Additionally Tyson Foods is the largest provider of human protein in the world and the largest feed manufacture in the United States and they are headquartered in Springdale Arkansas. The suggestion to implement this program originated in the Ag Advisory Board meeting from a Human Resource Officer with Tyson Foods and supported by a second member of the advisory board representing Cargill also an international producer and marketer of food. Based on these recommendations we seek to implement this program.

Program Admission Requirements: None How does this proposal support the University Mission or University Strategic Planning Goals? Attach a detailed assessment plan including specific learning objectives and means to assess each objective.

The Agriculture Business (Feed Mill Management Option) that is proposed will provide an educational opportunity to students in our geographical region and meet the needs of local and national Agricultural Businesses. It also supports and promotes the historic foundation of Arkansas Tech University which is Agriculture. This combination supports and serves two vital areas of need in our geographical area and will foster education and encourage life-long learning. Additionally the program supports the Universities Strategic Plan by offering a new program that is considered necessary by the Agriculture Industries in our region.

List the names and credentials of all faculty teaching course in the proposed program.

In the Department of Agriculture, there are seven faculty members contributing to the proposed Agriculture Business (Feed Mill Management Option).

<u>MOLLY BRANT</u> (Associate Professor) earned her Ph.D. from Kansas State University in 2005 and has been a full time faculty member since the fall of 2005.

<u>JIM COLLINS</u> (Professor) earned his Ph.D. from Louisiana State University in 1982 and has been a full time faculty member since the fall of 1983.

<u>MIKE FAIRBANKS</u> (Assistant Professor) earned his Ph.D. from the University of Arkansas in 2002 and has been a full time faculty member since the fall of 2007

<u>RANDY RENFRO</u> (Assistant Professor) earned his M.S. from the University of Arkansas in 1983 and has been a full time faculty member since the fall of 1993

<u>ALVIN WILLIAMS</u> earned his DVM from Oklahoma State University in 1981 and has been a visiting Instructor since the spring of 2009.

MALCOLM RAINEY (Professor) earned his Ph.D. from Mississippi State University in 1988 and has been a full time faculty member since the fall of 2010.

<u>JUSTIN KILLINGSWORTH</u> (Assistant Professor) earned his Ph.D. from the University of Missouri in 2012 and has been a full time faculty member since the fall of 2011.

<u>JIMMY O. BAILEY</u> (Assistant Professor) earned his M.S. from Arkansas Tech University in 2009 and has been a full time faculty member since the fall of 2010.

Total number of faculty required (existing and new) For new faculty members include expected credentials/experience and hire date No new faculty will be required for the addition of this new program.

For proposed graduate programs attach curricula vitae for the faculty teaching the program

Description of Resources

Current Library and instructional facilities

Current library and instructional facilities are adequate.

New Resources Required (include costs and acquisition plan):

No new resources are required for the addition of this new program.

New Program Costs (Expenditures for first three years of program operation) There are no new cost are associated with the addition of the Agriculture Business Feed Mill Management Option.

Include:

New administrative costs New faculty New library resources and costs New/renovated facilities and costs New instructional equipment and costs Distance delivery costs Other new costs

Thad Hinkle Cargill Pork 104 South Boulder Russellville, AR 72801

To whom it may concern:

It has been brought to my attention that the Arkansas Tech University Agriculture Department is proposing a Feed Mill Management option in the existing Agriculture Business major. I enthusiastically support the addition of this new option for students in the department.

I am a 1989 graduate of ATU with an agricultural business degree. After 23 years in the agricultural industry I can fully appreciate and understand the need for more students to have a much broader agricultural business background. While this degree would prepare students for careers with multiple agriculture companies, feed mill management fits a very specific need within Cargill Incorporated which operates two feed mills in Arkansas and four feed mills within Cargill Pork. Cargill Feed & Nutrition and Cargill Premix & Nutrition represent an organization of more than 16,000 employees at more than 250 facilities in 36 countries, serving customers in more than 100 countries.

A curriculum in feed mill management, nutrition, and ingredient merchandising is especially important and timely given the challenges facing the global agriculture economy. The need for a safe and stable food production system, coupled with the increased production of biofuels, has created a situation where the demand for feed ingredients has never been higher in United States history. Considering projected global population growth, there is no doubt that the agriculture industry will continue to be asked to provide safe and nutritious proteins for the world. Sixty percent or greater of the cost of protein production is feed stuffs and as the cost of ingredients continues to climb, the demand for engaged, imaginative, and creative people to pursue careers in agriculture is critical for the success of Cargill, and the industry as a whole.

I believe this program, and others like it, will serve as a model that separates the agriculture department from its competitors and makes ATU students stand out when it comes to competing for job opportunities in the future.

Sincerely,

Thad Hinkle Cargill Pork LLC Operations Manager

Malcolm Rainey Jr

Dr. Rainey,

I have forwarded this on to our Director of HR and she will be contacting you. We are very interested and would like to participate.

Kevin McDaniel VP-Production OK Farms

From: Esters, Brian Sent: Wednesday, September 26, 2012 10:31 AM To: McDaniel, Kevin Subject: Fw: Program Proposal

From: Malcolm Rainey Jr [<u>mailto:mraineyjr@atu.edu]</u> Sent: Wednesday, September 26, 2012 10:29 AM To: Esters, Brian Subject: FW: Program Proposal

Good morning Mr. Esters,

I have attached the curriculum matrix and program proposal. The program proposal has a part that I have highlighted which is what needs to be addressed in the letter. I don't know if these will help but the Program is Agriculture Business Feed Mill Management Option includes the following major courses:

- Principles of Animal Science
- Feeds and feeding
- Livestock and Poultry Nutrition
- > Poultry Management
- Poultry Processing and Product Technology
- Principles of Crop Science
- > Agriculture Waste Management
- > Principles of Agriculture Business
- Principles of Agriculture Macroeconomics
- Principles of Agriculture Microeconomics
- Agri-Business Management
- Agriculture Marketing
- Agriculture Finance
- > Agriculture Policy
- > Agriculture Price Analysis
- Agriculture Investments
- > Agriculture Farm Management

Assessment evidence may come from direct and indirect measures of students s well as analysis of the current state of the discipline. e is designed to take the place of COMS 4203 which is currently required by all majors in the

As methods of system development, technology, and industry expectations have changed, it is necessary to cover these basic concepts at an earlier time in the degree plan. COMS 4203 was introduced when databases were relatively new to the field. As the implementation of database technology has grown exponentially in the corporate world, it is necessary to place this course in a more appropriate position of a Junior Level so that the proper sequencing will allow it to flow to courses on the Senior level that require this knowledge as a pre-requisite.

The changing in wording is also intended to better map to the above mentioned changes.

How will the effect of the change be monitored in ongoing program assessment?

Course objectives, as currently mapped to our program outcomes for our degrees in Information Systems, Computer Science, and Information Technology will continue to be monitored both through campus assessment methods and ABET accreditation guidelines.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached.

Catalog Description

, *u*i

Prerequisite(s): COMS2003, COMS2203 and COMS2903

This course focuses on the design and implementation of relational database systems. Fundamental principles of databases such as relational model, conceptual design and normalization are covered. Students will also gain experience in database and query implementation using a DBMS and SQL.

Required Text:

Database Processing—Fundamentals, Design, and Implementation, David Kroenke and David Auer, Prentice Hall, 978-0132145374, 12th ed, 2012

Course Objectives

Upon successful completion of this course, students will be prepared to:

- Describe the major components and functions of a database and database management system (DBMS).
- Develop a data model for a database application using ER diagrams or UML class diagrams.
- Design a normalized database which is free of modification anomalies.
- Implement a database and its applications using an appropriate DBMS.
- Use a database language such as SQL to manipulate objects and access data of a database.
- Describe major operational issues associated with database applications such as transaction management, security, and integrity.

Assessment Methods

The following five course components with their relative weights will be used to determine a student's grade in this course.

1. Homework Assignments	20%
2. Projects	10%
3. Quizzes	20%
4. Midterm Exams	20%
5. Final Exam	<u> </u>
Total	100%

A student's final grade in this course will be

A, if the weighted total ≥ 90

J)

- B, if the weighted total is 80 or higher but less than 90
- C, if the weighted total is 70 or higher but less than 80
- D, if the weighted total is 60 or higher but less than 70
- F, if the weighted total below 60

Course Policies and Procedures

Class Attendance and Classroom Protocal:

- 1. Students should attend all class meetings on time.
- 2. The instructor will maintain a record of each student's attendance.
- 3. Three unexecused absences of class meeting will result an 'F' grade of the course.
- 4. Students who have their absences excused are fully responsible for the completion of missed work and the material presented or discussed in class.
- 5. Private computers may be used during class only if they are used to support class activities.
- 6. No cellular phones or other electronic communication devices are allowed during class or exam time. Students are required to mute their cellular phone until class is dismissed.
- 7. No web browsing or programs other than those used for the class are allowed during lecture.

Communication:

- 1. Blackboard (bblearn.atu.edu) will be used by this course to deliver course materials, including syllabus, lecture notes, announcements, data and/or program code files, homework assignments, grade book, course relevant web sites, emails, and discussion board, etc.
- 2. It is every student's responsibility to check Blackboard regularly for class and grade information.
- 3. Students are always welcomed to meet instructor during his office hours or by appointment.
- 4. Students can also email the instructor for questions or assistance for some class work. Each such email should have a subject begins with the course number 4203 or 5203.

Assignments:

- 1. Unless otherwise specified, all assignments and projects are each student's individual responsibility and must not be copied or plagiarized from others or Internet resorce. ATU academic integrity policies apply strictly to all work of everyone in this course.
- All homework assignments and projects will be given with a due date/time specified. On time completion and submission are expected for grading. <u>Late submission within 24 hours</u> past due will receive half-credit at most; others will not be graded.
- 3. All graded work will be returned in class or on Blackboard with feedback comments for review and record.

Quizzes and Exams:

÷

- 1. Quizzes (5-15 minutes) and exams (1-2 hrs) will contain questions based on material in the textbook as well as other material such as homework assignments, lecture notes, or in-class exercises.
- 2. Quizzes and exams may be given online or on paper or both. They may be held without a notice.
- 3. Quizzes cannot be made up with a grade.
- 5. Make-up for midterm and final exams can only be arranged for execused absence.
- 6. Final exam of this course is scheduled by the University, which is 8:00 10:00am, Monday, December 10 in Corley 235.

Academic Dishonesty:

- Plagiarism and cheating are serious offenses and may be punished by <u>failure in the course</u>. This course will comply with all academic dishonesty policies and regulations of the University (see "Regulations and Procedures" section of your course catalog).
- 2. Penalty of plagiarism or cheating will range from receiving a zero grade or as much as a <u>negative</u> grade equal to the maximum possible grade for that work to a grade of 'F' of the course. The instructor reserves the right to execute the full range of options. In most cases *all* parties who are invloved in a cheating case will be punished *equally*.
- 3. The following is a non-comprehensive list of situations which are considered cheating and/or plagiarism:
 - a. Having in your possession a copy, either printed or electronic, of another person's work for the course. "Possession" here includes the drive space allocated to you by Computer Services (i.e., the U: drive).
 - b. Submitting another person's work as your own with or without changes.
 - c. Viewing another person's paper or screen during a test.
 - d. Bringing into the classroom notes, messages, or crib sheets in any format which gives the student extra help on a test, and which were not approved by the instructor.

- e. Accessing any software other than that is allowed by the instructor during a test.
- f. Obtaining advance copies of a test by any means.

• •

.

- g. Hiring a substitute to take an exam or bribing any other individual to obtain exam or quiz questions.
- h. Communicating with another person during a test by any means, electronic or otherwise.
- i. Submitting text or program codes or pictures for a grade retrieved from any source without proper citation.
- j. Submitting files for a grade that were not created under your account.
- 4. More scenarios that highlights typical cases of academic dishonesty are available for your reference in T:\Nancy.Park\What is Academic Dishonesty (in both .doc and .htm formats.) Rules implied by these scenarios should also be followed.
- 5. Every academic dishonesty case will be reported to the department head's office for further process.

Vice President for Academic Affairs		
John Watson	<u> </u>	

Course Subject:	Course Number:			
COMS	3243			
Cross-listed with Subject:	Course Number:			
Official Title (Limited to 30 characters including spaces) Data Mining	· · ·			
Mode of Instruction: (check appropriate box) Image: Construction in the second structure in the				
Effective Term: 🛛 Spring 🖾 Summer I	If course is required by major/minor, how frequently will course be offered? Annually			
Is this course repeatable for additional earned hours?	No How many times?			
Does this course require a fee? N/A How muc	h? Type of fee?			

⊠Major **Minor** If major or minor course, you must complete the Request for Program Change form. Prerequisites: **Co-requisites:** COMS 3233 and 3 hours statistics Course Description (as you want it to appear in the catalog): Introduction to knowledge discovery from large databases; terminology, algorithms, methodologies, software, limitations, implications, and current trends. Students will implement and evaluate data mining techniques. Grading Standard Letter DP/F Other (If other, please specify below) For the proposed course, attach a syllabus that includes: a. Course subject, number and title b. Course description as to appear in catalog c. Course goals and/or objectives d. Course outline e. Methods of student performance assessment and evaluation f. Course bibliography, reading list, and /or listing of other instructional media Will this course require any special resources such as unusual maintenance costs, library resources, special software, distance learning equipment, etc.? Please specify. SAS Software (Currently obtained by University – may need additional licenses if course demand grows as this software is also used by other departments.) Will this course require a special classroom (computer lab, smart classroom, or laboratory)? Please specify. Computer Lab - Currently available in department How does this proposal support the University Mission or University Strategic Planning Goals? This course is being established to keep up with the ever changing needs for data in organizations. Working with large-scale databases is a skill useful from our graduates in today's workforce. Please provide a rationale for the need for this new course including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline. The current trend in the discipline found from industry papers, alumni, and prospective employees strongly expounds the need for students to have exposure to knowledge discovery from large scale databases.

How will the effect of the change be monitored in ongoing program assessment?

Course objectives will be mapped to our program outcomes for our Information Systems degree and be monitored both through campus assessment methods and ABET accreditation guidelines.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached.

N/A

COMS 3243 Data Mining ARKANSAS TECH UNIVERSITY Department of Computer and Information Science Semester

· · · ·

Instructor Information			
	Office Hours:		
Text	Introduction to Data Mining (2006) Authors: Tan, P., Steinbach, M., and Kumar, V. ISBN: 0321321367 (Amg 3233)		
Catalog Description	Prerequisites: 3 hours of database and 3 hours of statistics. Introduction to knowledge discovery from large databases: terminology, algorithms, methodologies, software, limitations, implications, and current trends. Students will implement and evaluate data mining techniques.		
Objectives, Content & Rationale	 Upon successful completion of this course students will be able to: Identify the fundamental terms, concepts and theories associated with data mining. Implement and evaluate data mining algorithms. Recognize the role, implications, and limitations of data mining techniques Demonstrate a proficiency in data mining software (e.g. SQL, SAS) 		
Assessment	Attendance/In-class participation5%Projects/Homework/Quizzes35%3 Exams (20% each)60%100%		
	PLEASE NOTE: ATTENDANCE IS A NECESSITY. NO MAKE-UP EXAMS WILL BE GIVEN		
Bibliography	There is no required supplemental reading list for this course.		
General Education Requirements	This course does not meet any General Education requirements.		

Students must adhere to the rules set forth in the student handbook

Cheating & Conduct

- Consider your actions carefully: there will be no tolerance for conduct that even gives the appearance of cheating.
- Students are expected to respect the rights of others.

Students must do their own work.

Students should not hesitate to clarify any question regarding the • policies of this course with the instructor.

Course Outline:

I. Introduction. (4-8 hours lecture time)

- A. Concepts of data mining
- B. Knowledge discovery process
- C. Mining different kinds of data and knowledge
- D. Evaluation of data mining discoveries
- E. Applications/case studies
- F. Industry/social impacts
- G. R/SAS/SOL Introduction/Refresher
- II. Data Pre-Processing, Data Warehousing, and OLAP (4-8 hours of lecture time)
 - A. Data cleansing
 - B. Data summarization, sampling, and transformation (basic statistics for large quantities of data)
 - C. Data Visualization
 - D. Data Warehousing
 - E. OLAP (drill down, roll-up, slice-dice, pivot)
- III. Association and Correlation Analysis (4-8 hours of lecture time)
 - A. Contingency tables for association pairs and changes in matched pairs
 - B. Loglinear models for multi-item associations
 - C. Correlation analysis
 - D. Project(s) implementing association analysis
- IV. Clustering (4-8 hours of lecture time)
 - A. Survey of clustering methods, including hierarchical, k-means etc.
 - B. Project(s) implementing clustering algorithms
- V. Classification (2-6 hours of lecture time)
 - A. Survey of classification methods, including decision trees, nearest neighbor, artificial neural networks, etc.
 - B. Projects implementing classification algorithms
- VI. Anomaly/Outlier detection (4-8 hours of lecture time)
 - A. Survey of statistical techniques
 - B. Project(s) implementing anomaly detection algorithms
- VII. Prediction (2-6 hours)

Plagiarism.

Policv

5

- A. Regression/Spatial/Time Series Models
- B. Project(s) implementing prediction data mining
- VIII: Trends and Specific Applications of Data Mining (as time allows)
 - A. Web Mining

- B. Text Mining
- C. Information Quality
- **D.** Future Directions

Graduate Council (if applicable)		
Registrar	Champion R. A	
Tammy Rhodes	Prinny Kudles	10/12/12
Vice President for Academic Affairs	T	
John Watson		[]

		ר
Program Title:	Effective Date:	
Information Systems	Fall 2013	
Outline change in program and attach curriculum	matrix:]
1. Change COMS 4203 Database Concepts to DCIC+C	SCOMS 3233 Database Design & Implementation Add	
2. Delete ACCT 2013 Accounting Principles II	and ECON 2013 Principles of Economics II	
3. Delete COMS 2853 COBOL and Delete COI	MS 4303 Client Server and add 3 hrs Sicia	Science
4. Add COMS 3163 Web Programming, COM of Business	S 3243 Data Mining, BLAW 2033 Legal Environment	
5. Modify footnote 2 from: 1000-level courses may not be used to satisfy this requirement to: 1000-level courses may only be taken to satisfy this requirement with the explicit permission of the Computer and Information Science Department Head.		
6 Add footnote 2 to the General Elective		
What impact will the change have on staffing, on ot	ther programs and space allocation?	
ACCT 2013 and ECON 2013 will be dropped from the	he College of Business.	

BLAW 2033 will be added from the College of Business.

The College of Business should anticipate a decrease in the enrollment of ACCT 2013 and ECON 2013 of approximately ten students per year. A corresponding increase in the enrollment of BUAD 2033 of approximately ten students per year should also be expected.

Please provide a rationale for the need for this new course including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

Change 1. Allowing for change request to renumber COMS 4203 to COMS 3233.

Change 2. The focus of Information Systems in Business and Industry has become much broader than the financial side and emphasis needs to focus on these other areas. Also, ABET accreditation has reduced its requirements in these areas to fit this change in focus.

Change 3. Industry needs have changed in the area of specified programming languages, particularly with **COBOL.** Also the concept of Client/Server has changed over time to blend with other areas addressed in the department, specifically the area of web programming.

Change 4. The addition of Web Programming, Data Mining, and Legal Environment of Business are in direct alignment with industry needs. As the web and data needs becomes increasingly significant to industries, and with it the need for legal understanding, the need for graduates understanding these concepts also increases.

Change 5. Our goal is to restrict students from taking courses that are designed for the general student body – not technology majors – that are covered in major courses and give no added value to the education experience. However, there are a few from other degrees/disciplines that, given the focus of **the student, may prove beneficial**.

Change 6. See Change 5 Rationale

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

See College of Business Support Form

Program Title:	Effective Date:			
Information Technology	Fall 2013			
Outline change in program and attach curriculum n	natrix:			
1. Change COMS 4203 Database Concepts to COMS 3233 Database Design & Implementation Delete				
2. Delete 3 hours of 2000+ general electives				
and 3 hours of 3000+ COMS Networking Electives				
(Note: Networking Elective Requirement should be removed from footnote and additional COMS Electives				
3. Add COMS 2213 Data Structures and COMS 2163 Scripting Languages				
What impact will the change have on staffing, on other programs and space allocation?				
COMS 2213 Data Structures will need to be on the schedule Fall and Spring.				
Please provide a rationale for the need for this new co program assessment. Assessment evidence may con	urse including the evidence derived from your me from direct and indirect measures of student			
learning as well as analysis of the current state of the	e discipline.			

Change 1. Allowing for change request to renumber COMS 4203 to COMS 3233.

Change 2. Students will still retain adequate elective courses to allow for following interest areas. However, the discipline is turning in the direction such that there is more need to specify the topics that students will encounter. Also, with changing demands in the industry, students will be better suited to be able to choose their elective based on the niche in the field that they wish to pursue, not necessarily networking.

Change 3. COMS 2213 Data Structures will be added to the program in support of feedback / assessment from employees and alumni that points to Information Technology Majors needing a stronger background in the programming field. Also, this change will better align this program for applying for ABET Accreditation.

COMS 2163 Scripting Languages is being added to give students additional programming.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

Curriculum Proposals for 2013-14 Catalog

November 6, 2012 Curriculum Committee / November 13, 2012 Faculty Senate

Department of Agriculture

- 1. Modify the Curriculum in Agriculture Education for Teacher Licensure as follows:
 - (a) Delete AGPM 3104, Introduction to Entomology;
 - (b) Delete one hour of Elective;
 - (c) Add AGPS 1033, Introduction to Agronomy;
 - (d) Add AGAS 3021, Livestock Selection and Evaluation; and,
 - (e) Change the course number for AGAS 2083, Feeds and Feeding, to 2084.

Department of Art

- 1. Change the course number for ART 2703, Introduction to Sculpture, to ART 3073.
- Modify the prerequisites for ART 3703, Sculpture Studio I, and ART 3713, Sculpture Studio II, from Prerequisite: ART 2703 and Sophomore Review; to ART 3073, Introduction to Sculpture.
- 3. Modify the Curriculum in Graphic Design as follows: Delete ART 2303, Figure Drawing, and add 3 hours of Art Electives.
- 4. Modify the Curriculum in Fine Arts as follows: Change the course number for ART 2703, Introduction to Sculpture, to ART 3073.
- 5. Modify the Curriculum in Art for Teacher Licensure as follows: Change the course number for ART 2703, Introduction to Sculpture, to ART 3073.

Arkansas Tech University PROPOSAL FOR CHANGE IN PROGRAM

TO: Curriculum Committee or Graduate Council (as appropriate)

Teacher Education Council (if applicable)		
Graduate Council (if applicable)		
Registrar	Jammyelluodes	10/1/12
Vice President for Academic Affairs	0	

	······································			
Program Title:	Effective Date:			
BS in Agricultural Education	2013-14 Academic Year			
Outline change in program and attach curriculum matrix:				
Delete AGAS 2082 Freds and Freding and Add Ar	SAS 2084 Feeds and Feeding			
Delete AGPM 3104 (Introduction to Entomology) a	nd 1 Elective Hour from the program of study;			
Add AGPS 1033 (Introduction to Agronomy) and AGAS 3021 (Livestock Selection and Evaluation).				
What impact will the change have on staffing, on other programs and space allocation?				
No new faculty will be needed for the additional course.				
Please provide a rationale for the need for this new course including the evidence derived from your				
program assessment. Assessment evidence may come from direct and indirect measures of student				
learning as well as analysis of the current state of the discipline.				
Proposed changes align more closely with breadth of	content for development of Arkansas agriculture			
educators. There are no secondary agriculture courses or FFA contests in Arkansas that present need for in-				
depth background in entomology. Content in agronomy and livestock evaluation would benefit preservice				
development for teaching in agriculture classes (i.e., Survey of Ag Systems, Animal Science, and Biological				
Animal Science) and supervising agricultural experiences (e.g., livestock entrepreneurship projects).				
Likewise, other reputable institutions (e.g., University of Missouri, University of Arkansas, and Oklahoma				
State University) have previously justified similar cou	rse offerings.			

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

Course changes should not impact other departments.

of other courses, a Course Change must be submitted to address all changes in related				
courses.				

. Q

New Course Number : Art 3073

5

New Course Title (Limited to 30 characters including spaces): Same course title: Introduction to Sculpture

New Course Description:

Same course description: Basic techniques of sculpture and sculptural composition. Modeling, casting, carving, and constructive processes are introduced. Studio six hours. \$100 art fee.

New Cross-list:

□ Adding Cross-listing □ Changing Cross-listing □ Deleting Cross-listing If adding or changing cross-listing, indicate course subject and number _____

New Prerequisite (list all, as you want them to appear in the catalog): Completion of sophomore review or permission of Department Head

New Co-requisite (list all, as you want them to appear in the catalog): N/A

Elective X Major Minor

If major or minor course, you must complete the Request for Program Change form.

Please provide a rationale for the change including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

This course is currently being offered by all other Public four year universities in Arkansas as a 3000 level course. Art 2413 Intro to Three-Dimensional Design (a 3D media foundation course and prerequisite for Intro to Sculpture at all 4 year Public universities, including ATU) is a 2000 level course. All other intro to studio media class (such as Art 3803 Intro to Printmaking, Art 3603 Intro to Ceramics, Art 3403 Intro to Painting, Art 3903 Introduction to Fiber Arts) are 3000 level courses. The only exception is Art 1303 Intro to Drawing which is a core level class. It would allow students who transfer in to get equivalent level credit if taken at another institution. Many of our graphic design majors currently take this course receive general- elective credit. It would allow them to take the course as a major elective and make it easier for them to attain the 40 hour upper level credit requirement. It will also help to decrease the need for 3000 and 4000 special problems courses for Graphic Design majors

How will the effect of the change be monitored in ongoing program assessment? Assessment for this course will be conducted through our current UD Junior Review and individual course assessment measures.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

VOID: See Fall 2012 Cosmetic Changes for approved changes

Bachelor of Arts in Fine Art		
Outline change in program and attach curriculum r	natrix:	
Change course number of Art 2703 Introduction to	Sculpture, to ART 3073.	
What impact will the change have on staffing, on o	ther programs and space allocation?	
Change will help decrease the number of Special P	roblems offerings for graduating seniors.	
Please provide a rationale for the need for this new o	ourse including the evidence derived from your	
program assessment. Assessment evidence may c	ome from direct and indirect measures of student	
learning as well as analysis of the current state of t	he discipline.	
This course is currently being offered by all other Public four year universities in Arkansas as a 3000 level course. Art 2413 Intro to Three Dimensional Design, a 3D media foundation course and prerequisite for Intro to Sculpture at all 4 year Public universities; including ATU is a 2000 level course. All other intro to studio media class (such as Art 3803 Intro to Printmaking, Art 3603 Intro to Ceramics, Art 3403 Intro to Painting, Art 3903 Introduction to Fiber Arts) are 3000 level courses. The only exception is Art 1303 Intro to Drawing which is a core level class. It would allow students who transfer in to get appropriate level credit if initially taken at another institution. Many of our graphic design majors currently take this course receive general- elective credit. It would allow them to take the course as a major elective and make it easier for them to attain the 40 hour upper level credit requirement. It will also help to decrease the need for 3000 and 4000 special problems courses for Fine Art and Graphic Design majors.		

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

Graphic Design			
Outline change in program and attach curriculun	n matrix:		
To remove figure drawing as a required course fe	or Graphic Design Majors		
What impact will the change have on staffing, or	other programs and space allocation?		
This will have a positive impact as it will take less space and staff to offer the course.			
Please provide a rationale for the need for this new	v course including the evidence derived from your		
program assessment. Assessment evidence may	come from direct and indirect measures of student		
learning as well as analysis of the current state o	f the discipline.		
The role of traditional illustration in the current Graphic Design field has changed and the some of the skills of figure drawing like character illustration are being addressed in the ART 3253 Computer Illustration course. The Graphic Design students can still take Figure Drawing as an elective but it would open up room for the addition of more advanced courses in the future.			
Making this change offers Graphic Design Majors some flexibility in their curriculum, alleviates the			
congestion in the enrollment while leaving it available for those Graphic Designers Interested in careers in			
Illustration.

<u>Curriculum Proposals for 2013-14 Catalog</u> April 2, 2013 Curriculum Committee / April 9, 2013 Faculty Senate

Department of Agriculture

1. Delete the Curriculum in Agriculture Business Pest Management Option.

Department of English and World Languages

1. Add ENGL 2183, Honors Introduction to Film, to the course descriptions.

University Honors

1. Change the course number for HONR 1001, Freshman Honors Seminar, to 1003

Department of Mathematics

- 1. Delete MATH 0803, Beginning Algebra, from the course descriptions;
- 2. Modify MATH 0903, Intermediate Algebra, as follows:
 - a. change the title to Beginning and Intermediate Algebra;
 - b. remove the prerequisites;
 - c. allow for the course to be repeatable and all attempts be included in passed hours unless student petitions for a repeat of a grade of D or F to be removed from grade point average; and,
 - d. add new grades to the grading as outlined in the proposal:

Old Course Description:

Prerequisites: One unit of high school algebra, grade of C or better in MATH 0803, or consent of the Mathematics Department.

The purpose of this course is to prepare for college level mathematics those students whose mathematics background is inadequate. Content of the course is fundamental operations, linear equations, special products and factoring, fractions, functions, graphs, and systems of linear equations.

Note: The grade in the course will be computed in semester and cumulative grade point averages, but the course may not be used to satisfy general education requirements nor provide credit toward any degree.

Note: A student who makes a D or F in MATH 0903 must repeat the course in each subsequent semester until he or she earns a grade of C or better.

New Course Description:

The purpose of this course is to prepare for college level mathematics those students whose mathematics background is inadequate. Content of the course is the language of algebra, fundamental operations, signed numbers,

various equations, problem solving, special products and factoring, fractions, functions, graphs, exponents, and systems of linear equations.

Note: The grade in the course will be computed in semester and cumulative grade point averages, but will not be calculated in earned hours. The course may not be used to satisfy general education requirements nor provide credit toward any degree.

Note: The course is repeatable allowing hours for financial aid purposes. All attempts of the course will be included in the semester and cumulative grade point average. Students earning the grade of D*, F*, or FE may repeat the course and petition the Registrar's Office to have the quality hours and quality points removed from the in semester and cumulative grade point averages.

Note: A student must achieve a grade of A*, AQ*, B*, BQ*, C*, or CQ* to satisfy the requirements to enroll in MATH 1003. A student must achieve a grade of A*, B*, or C* to satisfy the requirements to enroll in MATH 1113. A student earning a grade of AN*, BN*, CN*, D*, F*, or FE will be required to reenroll in MATH 0903.

e. Modify the prerequisites for MATH 1003, College Mathematics, as follows:

Old Prerequisites: Score of 19 or above on the mathematics subscore of the Enhanced ACT, score of 460 or above on the quantitative portion of SAT, score of 41 or above on the quantitative portion of the COMPASS mathematics section, or make a grade of C or higher in Math 0903.

New Prerequisites: Score of 19 or above on the mathematics sub score of the Enhanced ACT, score of 460 or above on the quantitative portion of SAT, score of 41 or above on the quantitative portion of the COMPASS mathematics section, or make a grade of A*, AQ*, B*, BQ*, C*, or CQ* in MATH 0903.

f. Modify the prerequisites for MATH 1113, College Algebra, as follows:

Old Prerequisites: Score of 19 or above on the mathematics portion of the ACTE exam, or score of 460 or above on the quantitative portion of SAT, or score of 41 or above on the COMPASS mathematics section, or grade of "C" or better in MATH 0903.

New Prerequisites: Score of 19 or above on the mathematics portion of the ACTE exam, or score of 460 or above on the quantitative portion of SAT, or score of 41 or above on the COMPASS mathematics section, or grade of A*, B*, or C* in MATH 0903.

g. Modify the prerequisites for MATH1914, Precalculus, as follows:

Old Prerequisites: Completion of high school algebra I and II with a grade of C or better and a score of 19 or above on the mathematics portion of the ACTE exam, or score of 460 or above on the quantitative portion of the SAT, or score of 41 or above on the COMPASS mathematics section, or MATH 1113 and MATH 1203, or a grade of C or better in MATH 0903.

New Prerequisites: Completion of high school algebra I and II with a grade of C or better and a score of 19 or above on the mathematics portion of the ACTE exam, or score of 460 or above on the quantitative portion of the SAT, or score of 41 or above on the COMPASS mathematics section, or MATH 1113 and MATH 1203, or a grade of A*, B*, or C* in MATH 0903. amended per Dr. Limperis

MAR 01 2013

ENGL 2183 Proposal, page 3

Registrar's Office

This proposal results from Dr. Jenkins analysis of Tech Honors Students' academic needs and her redesign of the Tech Honors Program.

How will the effect of the change be monitored in ongoing program assessment?

The course will be evaluated each time it is offered. Our departmental Assessment Committee is currently rewriting our departmental and program learning objectives. When that process is complete, we will make sure that this course's learning objectives reflect the changes to our departmental learning objective as well as those of the Honor Program.

If this course will affect other departments, a Departmental Support Form for each affected department must be attached.

This course serves the Tech Honors Program and should have no direct effect on any other department.

Sample Syllabus

RECEIVED

MAR 0 1 2013

ENGL 2183: Honors Introduction to Film

Registrar's Office

Instructor Information

<u>Syllabus</u>

Catalog Description

Prerequisites: Successful completion of ENGL 1013 or ENGL 1043 and admission to the Tech Honors Program or permission of the Honors Program Director. A study of film as an art form with particular attention given to genres, stylistic technique and film's relation to popular culture.

Objectives

Our goals in this course are 1) to acquire and develop an understanding of the craft and history of film, 2) to position American and international cinema in its broader artistic, historical, and cultural contexts, and 3) to think critically about films and filmmaking.

This course aligns with four of Arkansas Tech University's general education objectives:

- Students will learn to communicate effectively within their teams and within their written material.
- Students will learn to **think critically** and **develop ethical perspectives** by learning about and analyzing positions and worldviews that are different from their own.
- By watching, discussing, and analyzing films from different cultures and genres, students will **demonstrate** knowledge of the arts and humanities.

Required Materials: Phillips, William H. *Film: An Introduction*. 4th edition. (Bedford/St. Martin's, 2009)

Class Policies and Procedures

- Note on Subject Matter: The films shown in this class are widely considered by scholars and critics to have important artistic or technical merit, and are frequently taught in film studies courses around the country. Some films will be more to your taste than others, but all have educational value (thus why they are chosen). Sometimes, contemporary films shown in this class include strong language, nudity and "sexual situations," and/or scenes of violence. As adults, you are expected to approach these films with the same seriousness as you would approach any object of study in college.
- **Teams:** A component of this course is your active participation in an assigned team. While most of us have had (and will have) unpleasant experiences doing "group work," the fact remains that team collaboration is a key part of the vast majority of jobs: employees who are able to work effectively in teams are more successful than those who have difficulty with such skills. As well, working in teams allows you to have

more hands-on learning than a class of this size would normally allow. The approach we are using in this class is based on the well-researched "Team-Based Learning" method.

In this course, you will work with your teams on the following projects:

Blackboard Discussions

Study Groups

A Team Project

I will function as the mediator of your team, as needed. You are responsible to each of your team members, and will be evaluated on your dedication to your team and its assignments.

Attendance & Behavior: No work missed because of absence will be able to be made up, including quizzes. Attendance will be taken every day as required by Arkansas Tech University policy. If you do not come to class, you will not do well on the tests and quizzes, and thus will not do well in the course.

You should treat other members of the community (including your instructor) with respect and dignity. This includes not engaging in the following activities: sleeping during class, text-messaging or reading texts during class, using any electronic device during class (including a laptop of MP3 player), arriving late to class or leaving early from class, or any other behavior that is rude or disruptive to the instructor, your team, or your classmates. If this behavior persists, you may be asked to leave the class. In short, be respectable and polite.

Blackboard Posts: You are required to participate in the Blackboard group forum (found under "Teams" on the Blackboard course homepage). **You are required to write posts on Blackboard for 10 different movies** (there are 12 movie forums from which to choose). This gives you an opportunity to express your thoughts about the films we watch, and to discuss these thoughts with your team.

Each post is worth a maximum of 10 points, and will be graded based upon 1) originality (that is, your post must be different from previous posts about that film), 2) use of details from the movie, and 3) use of terminology from the textbook and/or lectures. You may choose to respond to another student's post; or you may post about another issue concerning the film by creating a new thread. Each post needn't be terribly long (at least a paragraph or so). Each individual movie forum has a due date for posting listed under on the forum topic.

As well, you may choose to earn extra credit points by writing more than the required posts. Extra credit posts are worth a maximum of 5 points each (same grading criteria as above) for a total extra credit score of no more than 25 points.

Exams: There will be two exams in this course—a midterm and a final—both of which will be comprised of multiple choice, true/false, film identification, and short essay portions. All assigned material from the book (whether discussed directly in class or not), films, and lectures are fair game for exams. You will need a 100-answer scantron for each exam, as well as for the quizzes.

Quizzes: There will be a number of unannounced quizzes based on the assigned reading and class lectures. If you miss a quiz because you arrived late or left early from class, or because you missed class altogether, then you earn a zero on that quiz. These quizzes account for 20% of your final course grade. Therefore, if you

RECEIVED

Registrar's Office

MAR 01 2813

ENGL 2183 Proposal, page 6

Registrar's Office

regularly have trouble making it to class (or if you do not keep up with the reading), you will not do well in the course. Quizzes are taken on 100-answer scantron forms; therefore, you will need to bring such forms to each class day, along with a #2 pencil.

Analysis Papers: There will be two papers in which you will analyze specific components of a chosen film: the first is an individual paper, and the second is a team project. Your team will have the option to make a short film in lieu of writing a second paper. More details on these assignments will be given in class. The grading of your writing in this course will be in accord with the "ATU English Department Theme Grading Standards" (copies available in WPN 141).

Your papers must be submitted on Blackboard before the class hours in which they are due. Late papers will be accepted the class period after the due date, but they will receive a 10% grade deduction. Papers not received by this point will earn a grade of zero. Comments about your paper can be found on Blackboard within two weeks of the paper due date.

A failing grade will be given to any paper that is discovered to include substantial passages that are quoted or paraphrased from another source without properly citing that source. This act of dishonesty may also warrant a failing grade in the course.

Grading:

Your grade in the course will be averaged as follows:

Quizzes			20%	200 points	
Team Discussio	n Posts		10%	100 points	
Individual Pape	r		10%	100 points	
Team Project			10%	100 points	
Team Participat	tion & Peer Evalu	ation	5%	50 points	
Midterm Exam			22.5%	225 points	
Final Exam			22.5%	225 points	
		100%	1000 poin	its	
Your final cours	e grade will be d	etermined by the n	umber of	points you ea	rn:
900-1000 A	800-899 B	700-799 C	600-699	D 0-59) 9 F

of other courses, a Course Change must be submitted to address all changes in related		
courses.		

MAR 04 1 3

Registrar's Office

New Course Number : 1003

New Course Title (Limited to 30 characters including spaces):

New Course Description:

New Cross-list:

□ Adding Cross-listing □ Changing Cross-listing □ Deleting Cross-listing If adding or changing cross-listing, indicate course subject and number ______

New Prerequisite (list all, as you want them to appear in the catalog):

New Co-requisite (list all, as you want them to appear in the catalog):

□Elective □Major □Minor If major or minor course, you must complete the Request for Program Change form.

Please provide a rationale for the change including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

According to best practices of the National Collegiate Honors Council, fostering a learning community among freshman Honors students is critical to improved retention and graduation rates. Expected revision of the freshman Honors curriculum at Tech will eliminate several courses and will create space for an expansion in Freshman Honors Seminar from one credit hour to three, providing more opportunities for collaboration and team building.

How will the effect of the change be monitored in ongoing program assessment?

The change in this course from one to three hours will provide increased opportunities for assessment of the University Honors Program. The expanded course will serve as the introduction to the program, as well as its core, and will allow the initiation of additional measures. The course will be evaluated each time it is offered. One expectation is that student retention and graduation rates will increase for the program.

If this course will affect other departments a Departmental Support Form for each affected department must be attached.

This change will not affect other departments.

Registrar's Office

HONORS 1003: FRESHMAN HONORS SEMINAR

Fall 2013

Section H01, Tues 6-8:50 P.M., WPN 238

Information

Professor: Dr. Jan Jenkins Office: Witherspoon Hall 239B Office phone: 479-968-0456 Office e-mail: ejenkins@atu.edu (do not use e-mail for absentee excuses) Office Hours: Office Hours: Monday – 10:00-11:00 a.m.; 2:00-3:00 p.m. Tuesday – 1:00-3:00 p.m. Wednesday -- 10:00-11:00 a.m.; 2:00-3:00 p.m. Thursday – 1:00-3:00 p.m. Friday -- 10:00-11:00 a.m. Or by appointment

Course and Course Goals

This is a required introductory course to the University Honors program and to Arkansas Tech University. During the course of the semester, we will meet once a week to hold discussions about university life and its challenges, meet professors from the various academic fields represented on campus, and hear guest speakers from the community and state talk to us about civic engagement and the work they do.

Required Text

No textbook will be required, but we will discuss a variety of topics, and I will make suggestions for readings on those.

Recommended and Useful

Strunk and White. *The Elements of Style*. 2000. Recommended for anyone who ever plans to write anything. Especially useful for college students.

Attendance

Attendance is required. I reserve the right to remove from the course and from the University Honors program any student who incurs unexcused absences in HONR 1003.

Grades

You will write **four** 2- to 3-page essays on topics to be decided in class and in collaboration with your classmates and professor.

Course Objectives

HONR 1003 provides the opportunity for freshmen in the University Honors Program to learn to work together, as they also learn what it takes to put their college years to the

MAR 0 4 2013

Registrar's Office

best constructive uses. We will investigate what Arkansas Tech University has to offer its students, and we will also spend time examining the role of citizens and academia in civic engagement. In keeping with the Mission Statement of Arkansas Tech University, HONR 1003 is designed to encourage and support "scholastic development, integrity, and professionalism." The course will also address several of General Education goals, including the following:

Communicate effectively

Think critically

Develop ethical perspectives

Demonstrate knowledge of the arts and humanities

Schedule and Important Semester Dates

Honors Back-to-School Meeting, RPL 300N, Tuesday, August 28, 3:30-5:00 p.m.
 Group Photo – Thursday, September 26 - wear your Honors t-shirt and jeans and meet on Pendergraft Library porch (the side facing Dean Building)

- •Essay 1 due Thursday, October 3
- •Essay 2 due Thursday, October 24
- •Essay 3 due Thursday, November 14
- •Essay 4 due Thursday, December 5

Absences for University-Sponsored Events

Absences necessitated by your participation in official university-sponsored events will be excused ONLY if you provide documentation from your organization's sponsor or coach (no e-mails, please). It is YOUR responsibility to clear this sort of absence with me, so please do not leave this important matter to someone else.

Sample Assignments and Readings

Readings must be completed before class, so you can participate in class discussion and other activities.

August 22 -- Introduction to University Honors and Arkansas Tech University

August 29 - Discussion:

Rebecca Stott, "Darwin in the House." *Smithsonian*. Feb 2013, Vol. 43 Issue 10, p60-67.

Mary Roach, "America's Dinosaur Playground." Smithsonian. Feb 2013, Vol. 43 Issue 10, p54-59.

September 5 - guest speaker

MAR 0 4 2013

Registrar's Office

September 12 – Discussion:

George B. Schaller, "Politics is Killing the Big Cats." *National Geographic*. December 2011, Vol. 220 Issue 6, p88-91.

Caroline Alexander, "A Cry for the Tiger." *National Geographic*, December 2011, Vol. 220 Issue 6, p62-87

September 19 - guest speaker

September 26 - Discussion:

Zora Neale Hurston, "How It Feels to Be Colored Me," 1928, at <u>http://xroads.virginia.edu/~ma01/grand-jean/hurston/chapters/how.html;</u> and Alice Walker, "Looking for Zora," 1975, at http://www.scribd.com/doc/3275022/Looking-for-Zora-296-313

October 3 – 1st essay due

October 10 - gathering for Honors Mentoring Teams

October 17 - guest speaker

October $24 - 2^{nd}$ essay due

October 31 - Halloween activity

New Course Title (Limited to 30 characters including spaces):

Beginning and Intermediate Algebra

New Course Description:

The purpose of this course is to prepare for college level mathematics those students whose mathematics background is inadequate. Content of the course is the language of algebra, fundamental operations, signed numbers, various equations, problem solving, special products and factoring, fractions, functions, graphs, exponents, and systems of linear equations.

Note: The grade in the course will be computed in semester and cumulative grade point averages, but will not be calculated in earned hours. The course may not be used to satisfy general education requirements nor provide credit toward any degree.

Note: The course is repeatable allowing hours for financial aid purposes. All attempts of the course will be included in the semester and cumulative grade point average. Students earning the grade of D*, F*, or FE may repeat the course and petition the Registrar's Office to have the quality hours and quality points removed from the in semester and cumulative grade point averages.

Note: A student must achieve a grade of A*, AQ*, B*, BQ*, C*, or CQ* to satisfy the requirements to enroll in MATH 1003. A student must achieve a grade of A*, B*, or C* to satisfy the requirements to enroll in MATH 1113. A student earning a grade of AN*, BN*, CN*, D*, F*, or FE will be required to reenroll in MATH 0903.

New Cross-list:

□ Adding Cross-listing □ Changing Cross-listing □ Deleting Cross-listing If adding or changing cross-listing, indicate course subject and number _____

New Prerequisite (list all, as you want them to appear in the catalog):

New Co-requisite (list all, as you want them to appear in the catalog):

Please provide a rationale for the change including the evidence derived from your program assessment. Assessment evidence may come from direct and indirect measures of student learning as well as analysis of the current state of the discipline.

The redesign of the course MATH 0903 is a part of the College Complete America grant funded project. The project involves several 2 and 4 year institutions of high education around the state. This

type of restructuring is a current trend in the instruction of remedial mathematics courses around the country. In fact, the College Complete America grant was one of ten grants awarded to states for the purpose of implementing similar changes to remedial math courses.

How will the effect of the change be monitored in ongoing program assessment?
