

*Dr. Elisabeth Brennan
Assistant Professor
Fisheries and Wildlife Program*

18 October 2007

Dear Dr. Hamm,

Enclosed please find the final report on the "Publication of Wildlife Monograph entitled "Habitat Use, Behavior, and Community Structure of Migratory Wetland Birds in the Rainwater Basin" grant I received as part of a faculty development grant from ATU in May 2007.

Thank you very much for funding this project. I am hopeful that this manuscript will contribute to the overall (albeit scarce) body of knowledge regarding the importance of habitat use of wetland birds during migration, as well as enhance the reputation of Arkansas Tech's Fisheries and Wildlife research program.

If you have any questions, please do not hesitate to contact me. Thank you again for funding this development grant.

Sincerely,

A handwritten signature in black ink, appearing to read "Elisabeth Brennan". The signature is fluid and cursive, with a long horizontal stroke at the end.

Elisabeth Brennan
