Logos and other identifying marks help us tell the story of Arkansas Tech University. Presenting our logos in a consistent manner allows us to protect and enhance our brand name.

The logos used to identify our university are one aspect of our constantly evolving efforts to distinguish Arkansas Tech in the marketplace. To that end, we have developed the new academic logos included in this manual.

Inside, you will find helpful guidelines for how to utilize the new academic logos. The successful implementation of this branding initiative will amplify the spirit of our campus community to our state, our region and beyond.

Please join me in embracing this new look with pride and enthusiasm.

Robert C. Brown, President
**PRIMARY COLORS**

Color is one of the most important elements of the Arkansas Tech University brand. The colors on the right are the official colors for all of the Arkansas Tech academic logos.

**Arkansas Tech Green**
(in lieu of which use “Pantone® 343”)
Process Equivalent: 94c 41m 79y 39k
RGB Equivalent: 0r 83g 62b
Hex Equivalent: 00533E

**Arkansas Tech Gold**
(in lieu of which use “Pantone® 116”)
Process Equivalent: 1c 18m 100y 0k
RGB Equivalent: 255r 206g 0b
Hex Equivalent: FFCE00

**SUPPORT COLORS**

In addition to the primary colors shown above, the Arkansas Tech brand utilizes Black and White as support colors. If the primary colors are not available, the logos should be printed in all Black. Logos may also be used in all White on either Black or Arkansas Tech Green backgrounds. Logos may be used in all White on other dark color backgrounds only if previously approved (see page 5). Arkansas Tech academic logos are never to be reversed.**

**Black**

**White**

* Pantone® is a registered trademark of Pantone, Inc. The colors shown on this page and throughout this manual are not intended to match the PANTONE Color Standards. For the PANTONE Color Standards, refer to the current edition of the PANTONE Color Formula Guide.

** See individual artwork guidelines for proper use of logos in all white.
The new Arkansas Tech academic marks were designed to create a consistent brand for our University. At the same time there are many variations to choose from so that there should be a design compatible to any application. The preferred logo is the primary mark shown largest on this page. Logos that do not contain lettering are for use only when the school name or logotype have been previously presented. The “Icon Only” logo is for use only when a logo or words identifying the university has been used on the cover.

All artwork and variations are available in Macintosh and PC digital file formats.
All of the Arkansas Tech academic logos are available in full color (Arkansas Tech Green, Arkansas Tech Gold, and White), as well as one color (all Arkansas Tech Green or all Black). Examples of some of the various color variations are shown on the right.

Special all White and all Arkansas Tech Gold versions of the logo have been created for use on either Black or Arkansas Tech Green backgrounds. (See page 5.) These logos may also be used in all White or all Arkansas Tech Gold on other dark color backgrounds only if previously approved through the Office of University Relations. The all White or all Arkansas Tech Gold logos should never be used on a light background with insufficient contrast.
Frequently it may be desirable to place the logos on a dark field of color. Special logo art has been created for this purpose. Shown on the right are the only versions of the logos allowed on dark color backgrounds. These logos should never be used on light backgrounds with insufficient contrast, or on overly complex backgrounds without the approval of the Office of University Relations. The preferred logo versions are always towards the left of the row.
Frequently it may be desirable to place the logos on a light field of color. Shown on the right are the only versions of the logos allowed on light background colors. These logos should never be used on backgrounds with insufficient contrast, or on overly complex backgrounds without the approval of the Office of University Relations. The preferred logo versions are always towards the left of the row.

To maintain the design integrity of the Arkansas Tech academic brand and maximize each logo’s effectiveness as an identifier, it is mandatory that all logos be applied as indicated in this manual without modification. The logos are not to be altered in any way. Shown on the right are unacceptable uses of Arkansas Tech academic logos.

- Never switch colors on any Arkansas Tech academic logo.
- Never use a white logo on a background with insufficient contrast.
- Never reverse any Arkansas Tech academic logo.
- Never reposition any elements in the Arkansas Tech academic logos.
- Never change the descriptor typeface in any Arkansas Tech academic logo.
- Never add unapproved wording to any Arkansas Tech academic logo.
- Never distort any Arkansas Tech academic logo.
- Never place a logo on a yellow background if it is designed for use on a green background.
- Never re-size the elements in any Arkansas Tech academic logo.
- Never add any element to an Arkansas Tech academic logo.
- Never distort any Arkansas Tech academic logo.
- Never place a logo on a yellow background if it is designed for use on a green background.
- Never angle or rotate any Arkansas Tech academic logo.
- Never fill in the right side of the Arkansas Tech academic logo.
- Never use Arkansas Tech academic logos with non-Arkansas Tech colors.
- Never use any Arkansas Tech academic logo in all Gold on a light background.
- Never fill in the right side of the Arkansas Tech academic logo.
- Never use any Arkansas Tech academic logo in all Gold on a light background.
Each of the Arkansas Tech academic logos has an established safe zone. This safe zone is intended to maintain the logo’s integrity and to avoid visual confusion. No other type or graphic element (including folds, trims or edges) should fall within the safe zone shown. The safe zone spacing is uniform on all sides of the logo, and the formulas for determining the safe zones are demonstrated on this page.

**Safe Zones**

1/6 the width of the logo

1/4 the height of the logo
The logo configurations shown on the right are capable of presenting different campus designations underneath the logos as demonstrated here. The size and position of these descriptors have been carefully established. Only the campus descriptors listed below are approved for use in these logos.

All other wording must be approved first by the Office of University Relations

AVAILABLE CAMPUS TEXT
- Ozark Campus
- Career Center
Using Campus Specific Logos on Color Backgrounds

Frequently it may be desirable to place the campus specific logos on a dark field of color. Special logo art has been created for this purpose. Shown on the right are the only versions of the logos allowed on dark color backgrounds. These logos should never be used on light backgrounds with insufficient contrast, or on overly complex backgrounds without the approval of the Office of University Relations.
The logo configurations shown on the right are capable of presenting different department names and marketing messages underneath the logos as demonstrated here. The size and position of these descriptors have been carefully established.

All wording must be created by the Office of University Relations.
Vertical Arkansas Tech marks may be used with an address block. The specifications on the right were created to provide a consistent look when address blocks are used with vertical Arkansas Tech marks.

The address blocks should be set in Gill Sans Italic with slightly open letterspacing.

For vertical Arkansas Tech logos, the copy block is positioned a distance below the logo equal to the height of “ARKANSAS” as indicated by “x.” The text height of the address block is 80% of the height of “ARKANSAS” as shown.

The address block text should be set with center alignment, following the text orientation of the original logo.

All address blocks must be created by the Office of University Relations.
Horizontal Arkansas Tech marks may also be used with an address block. The specifications on the right were created to provide a consistent look when address blocks are used with horizontal Arkansas Tech marks.

The address blocks should be set in Gill Sans Italic with slightly open letterspacing.

For horizontal logos, the copy block is positioned a distance below the logo equal to the height of “UNIVERSITY” as indicated by “y.” The text height of the address block is 75% of the height of “UNIVERSITY” as shown.

The address block text should be set in flush left or flush right alignment, following the text orientation of the original logo.

All address blocks must be created by the Office of University Relations.
Letters should employ a three-quarter-inch left margin aligning flush left with the Arkansas Tech academic icon at the top of the letterhead. Start the body of the letter 2.5" from the top of the page. The right margin is also 0.75", and the body of the letter should not extend beyond the “Arkansas Tech University” type at the top of the page as indicated. These letters should be set in block style, with flush left ragged right margins and single spaced paragraphs. Use double spacing between paragraphs — do not indent.

ARKANSAS TECH ACADEMIC FONTS
The primary typeface for the Arkansas Tech University identity is Luxury Gold. While Gill Sans Italic is the ONLY font to be used for the sub-branding text used in Arkansas Tech academic logos, using other weights and versions of Gill Sans for all university design and marketing initiatives is encouraged.

Luxury Gold and Gill Sans Italic fonts are available through the Office of University Relations.

MINIMUM LOGO SIZES

Each of the Arkansas Tech academic logos has a minimum allowable size. In order to ensure clear reproduction and legibility, the logos must not be used any smaller than the sizes shown on the right. It is preferred that the logos be used larger than their minimum size whenever possible.
FULL COLOR RETAIL GRAPHICS
If the fabric color matches one of the official colors exactly (Arkansas Tech Green, Arkansas Tech Gold or White), the fabric can show through in place of printing that color. If the fabric color does not match any official color, all 3 official colors must be used to print the logo.

EMBROIDERY
When creating an embroidered logo, all TEXT should be a minimum pf 3/16” tall. 1/4” is preferred.

STOCK COLORS
It is preferred that a “forest green” stock material be used. Never use “kelly green.”

ONE COLOR RETAIL GRAPHICS
When using logos on apparel, the art may print in all Arkansas Tech Green, all Arkansas Tech Gold, all Black or all White as long as there is sufficient contrast with the fabric color. Using single color Arkansas Tech academic logos are a great cost saving alternative to the full color logos.

FOIL STAMPING
It is permissible to foil stamp the one color art in metallic gold with approval.
USE OF FORMAL MARK
Arkansas Tech University has long been identified by its official seal logo (shown here). This mark is displayed on both our Russellville and Ozark campuses.

The official seal logo will continue as an identifying mark for Arkansas Tech, but it will be reserved for official documents such as degrees and other uses as directed by the Board of Trustees and the Office of the President.

CENTENNIAL LOGO
Arkansas Tech University developed a set of logos to commemorate the 100th anniversary of the founding of the institution (example shown here).

With a tagline of “A Century Forward,” the Arkansas Tech Centennial logos communicated the theme of the celebration and pointed toward a new visual identity for the university.

The Arkansas Tech Centennial logos were retired from use following the Arkansas Tech Centennial Convocation on April 29, 2011, and replaced by the visual identity outlined in this handbook. All communications from the university that might have included the centennial logos in recent years (letterhead, business cards, Web sites, brochures, apparel, etc.) should use the new visual identity from this point forward.
